Member since January 2020

## Management and Leadership

### Environmental Team

*All managers work together to brainstorm new ideas to reduce, reuse, or recycle everyday items we consume and use. We meet regularly to discuss ways these ideas can be implemented.*

### Environmentally Preferable Products and Services

*We have successfully eliminated all Styrofoam containers in house including to go containers and drink cup with eco-friendly packaging. We now only provide eco-friendly packaging!*

### Environmentally Preferable Purchasing

*We continue to purchase as much product as possible from local vendors to reduce emissions from goods that must be transported via trucks or other means.*

## Waste

### Solid Waste Reduction and Reuse

*We have replaced disposal drinking cups with reusable ones.*

### Recycling

*We always place all our cardboard (approximately 21,290 lbs. annually) into a recycling container near the restaurant and continue to encourage the city to reinitiate a recycling program.*

## Energy

### **Energy Efficiency**

*We have replaced all light sources with LED bulbs to reduce our energy consumption.*

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
