Management and Leadership

Environmental Policy Statement

Holmatro, Inc. is committed to reducing its impact on the environment. We will strive to improve our environmental performance over time and to initiate additional projects and activities that will reduce our impact on the environment. Our commitment to the environment extends to our customers, our staff and the community in which we operate.

We commit to:

- Comply with all applicable environmental regulations;*
- Reduce pollution by optimizing our manufacturing and recycling processes;*
- Train staff on our environmental program and encourage their participation and contribution;*
- Communicate our environmental commitment and efforts to our customers, staff and our community;*
- Monitor and measure our environmental impact and set goals to continually improve over time.*

Environmental Team

Holmatro has a very active Green Team that meets monthly and benefits from a strong commitment from the company's leadership. This team has focused on heightening their culture of energy awareness at the level of the individual, including efforts such as checking thermostat settings, closing blinds in

offices on the sunny side of the building, and making sure that production equipment not in use is powered down.

Environmentally Preferable Purchasing

Holmatro's policy is to consider the environmental impact of all purchasing choices. For example, our cardboard shipping boxes are SFI certified and we purchased EnergyStar computer equipment.

Waste

Solid Waste Reduction and Reuse

As part of Holmatro's commitment to creating a culture of sustainability, all the proceeds from these waste reduction efforts go into a fund for the employees that are used throughout the year for Lunches, Family Picnic and Christmas Party. It also allows me to give a monetary reward to an employee for outstanding performance.

Our latest waste reduction initiative involved switching from cardboard boxes to reusable plastic containers when shipping parts to our three divisions. The new containers are reused when the parts are shipped back to us reducing cardboard waste by approximately 2,000 pounds annually.

Recycling

Holmatro recycles 100% of its waste in the manufacturing process including all the steel and aluminum chips and bar drops, as well as the motor oils, hydraulic oils and coolants.

We are also committed to recycling beyond our manufacturing waste. Throughout the facility, recycling has been made easy and clear with signage, containers, flyers and banners.

Energy

Energy Efficiency

Over a five-year period, Holmatro has reduced its energy consumption prior to joining the RMI Energy Efficiency program in the spring of 2014.

As a result of joining the RMI program, Holmatro committed to making the following upgrades using the Maryland Energy Administration Lawton Loan program: installation of LED Lighting within the 80,000 square feet of factory space; installation of new rooftop units and upgrade controls and installation of de-stratification fans for air purification. Projected annual savings are 525,075 kWh with the upgrades.

Holmatro also has a profit sharing plan that encourages and incentivizes energy savings awareness throughout its operations.

Profile Updated October 2018

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
