Management and Leadership

☑ **Environmental Policy Statement**

Phoenix Computing Strategies, LLC is committed to reducing its impact on the environment. We will strive to improve our environmental performance over time and to initiate additional projects and activities that will further reduce our impacts on the environment.

Our commitment to the environment extends to our customers, our staff, and the community in which we operate. We are committed to:

- *Comply with all applicable environmental regulations;*
- *Prevent pollution whenever possible;*
- *Facilitate the environmental friendliness and efficiency of our clients;*
- *Train all of our staff on our environmental program and empower them to contribute and participate;*
- *Communicate our environmental commitment and efforts to our customers, staff, and our community; and*
- *Continually improve over time by striving to measure our environmental impacts and by setting goals to reduce these impacts each year.*

Signed by Rodney A. Buckingham, President

☑ **Environmental Team**

Our committee is made up of our two owners. We continually strive to discover and implement greener ways to conduct our business.

☑ **Environmentally Preferable Products and Services**

We implement solutions that allow us to conduct most of our business via remote support and monitoring. We also assist our customers with technologies that allow their workforce to be less centralized without losing productivity and help them with the recycling of their decommissioned computing equipment.

Waste

☑ **Recycling**

We recycle as much of our office waste as possible.

Energy

☑ **Energy Efficiency**

All lighting in our office is fluorescent or compact-fluorescent. All equipment we use, including our computers and servers, printers, and even our coffee machine are EnergyStar compliant.

Transportation

☑ **Efficient Business Travel**

Using our remote support technologies, employees are able to work from home typically one day a week.

☑ **Fleet Vehicles**

Over 95% of our service calls are made using two vehicles. One is a Gen4 Toyota Prius, the other is a 2012 Nissan Leaf Electric Vehicle. In its first seven weeks of service, our Leaf has prevented the release of 930 lbs of CO_2 emissions into the atmosphere (vs. a similarly sized gas vehicle).
