Management and Leadership

☑ **Environmental Policy Statement**

Our daily business mission extends beyond how we affect our clients and into the world around us. It is our goal to reduce our carbon footprint and our impact on the environment while bringing happiness to our clients. We want to be green because we care about the impact we have on the planet and all who live on it. We value working with clients and vendors who care the same as we do.

☑ **Environmentally Preferable Products and Services**

We order and use only recycled packaging to fulfill orders for one of our biggest clients and all returned packaging is recycled.

☑ **Environmentally Preferable Purchasing**

Waste

☑ **Recycling**

We recycled 85-90% of all of our waste including cardboard, paper products, plastic and aluminum containers, printer cartridges, batteries, etc. We also recycle our surplus wooden pallets. Another company in our area uses any extra that we have so none of them end up in landfills. We have recently opened a branch warehouse in Dover Delaware and are continuing with our recycling practices there also.

Energy

☑ **Energy Efficiency**

We have saved 10-20% on our electric bill by installing energy efficient lighting, motion sensing switches on all our lighting and huge ceiling fans in our warehouse for more efficient heating and cooling. We have also installed energy saving 3M window film on our office windows. To date, we have changed all of our outside lighting to LED and are continuing to change over all inside lighting as needed and are always looking for greener more efficient ways of doing business.

Profile Updated October 2018

Maryland

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
