March 2003

## Buhl begins work as Acting Secretary, looks ahead

By Richard McIntire and Jim Pettit

Lynn Y. Buhl returned to work as Acting Secretary of the Maryland Department of the Environment on March 19 following much debate

and a controversial vote by the Maryland Senate. The battle to win Senate approval of her nomination as Department Secretary began shortly after her announcement, only to grow in intensity between the Nominating Committee vote and the full Senate floor vote. Buhl, herself,

took on an unprecedented role in Maryland state politics for a newly-appointed cabinet Secretary, taking the reins of a 1000-person agency during a new administration while meeting with Senators, granting numerous press interviews and preparing for what was widely expected to be a contentious question and answer session of the Senate nominating committee.

Governor Robert Ehrlich, Jr. stood by his nominee through it all. "Lynn handled herself very professionally with dignity and composure during every step

of this process," the governor said. "She faced a very tough situation with uncommon fortitude and grace. I'm proud to have stood by her."

As Acting Secretary, Buhl will continue to handle all aspects of pollution prevention, environmental regulation and environmental enforcement in Maryland, including the administration of a combined operating budget of approximately \$250 million. Buhl will be working closely with Deputy Secretary Kendl Philbrick and MDE staff on reviewing department programs and procedures and will be making recommendations to Governor Ehrlich.

"Our job at the Maryland Department of the Environment has really just begun," said Philbrick. "I have worked closely with Lynn

since the day I met her, and will continue to do so as she makes recommendations to the Governor," he said.

As Acting Secretary, Buhl's priorities will include, in addition to addressing internal issues at the Department, the re-evaluating of current brownfields programs in Maryland. Brownfields are abandoned or underutilized industrial or commercial sites, located primarily in urban areas, that are either contaminated or perceived to be contaminated. Clean-up and redevelopment of these areas has become a major issue across the country. In addition, she will spearhead efforts to address the upgrading of wastewater treatment plants on the Chesapeake Bay watershed, a major environmental initiative of

## Maryland approaches wetlands goal

By Denise Clearwater & Amanda Sigillito

Wetlands are a resource that perform several very important functions for both society and the environment. Such functions include improving water quality, providing flood control and recharging groundwater reserves. Additionally, wetlands support a wide variety of wildlife, fish and plants.

The economic importance of wetlands to commercial fisheries and recreational uses is also enormous and a main reason why Maryland and its Bay partner states have embarked on aggressive plans to restore them.

It has been estimated that the U.S. has lost nearly half of the wetland acreage that

See WETLANDS, Page 4

## Philbrick assumes deputy post

By Richard McIntire

Kendl (Ken) P. Philbrick was named Deputy Secretary of the Maryland Department of the Environment (MDE) by Governor Robert L. Ehrlich, Jr. on January 31.

"Ken Philbrick is a leader whose management experience will be a tremendous asset as we continue to strengthen our environment," Governor Ehrlich said in making the appointment.

As Deputy Secretary of the Environment, Philbrick will assist the MDE Secretary in all aspects of pollution prevention, environmental regulation and environmen-

tal enforcement in Maryland, including the administration of a combined operating budget of approximately \$250 million. His position does not have to be confirmed by the State Senate.

"I enjoy the environment," Philbrick said. "I believe it is a God given gift for us to enjoy. But we have to act to use it responsibly."

Prior to his appointment, Philbrick served as Executive Vice President of LMC Properties, Inc., a wholly owned subsidiary of Lockheed Martin Corporation. For 10 years he was re-

## Alcoa's 'Z' team helps cut pollution

By Laura Armstrong

Alcoa Eastalco Works is a primary aluminum manufacturing facility located in Buckeystown, Maryland. In 1996, Eastalco became the first manufacturing plant in Maryland to achieve ISO 14001 certification and one of the first companies to join *Businesses for the Bay*. The plant also recently served as a host site for a pollution prevention (P2) training session for MDE water compliance staff. The training session provided MDE staff a chance to learn how to spot opportunities to reduce or eliminate pollution at the source and to encourage facilities they work with to take advantage of free, on-site, voluntary P2 assessments through the Maryland Technology Extension Service.

Aluminum is manufactured by passing an electric current through a carbon anode in electrolytic cells or "pots" of cryolite and alumina. Eastalco operates 480 pots and produces approximately 500 tons of aluminum per day. Scrap aluminum, concrete, asphalt, wood pallets, "off-spec" product, carbon dust, lead acid batteries, oil, anti-freeze, office waste, and other metals are all recycled by the plant. The facility has also reduced their water consumption by 20 percent (260,000 gallons per day) by recycling effluent water.

Eastalco's Environmental Task Force, known as the "Z" Team, is responsible for ensuring regulatory compliance as well as exploring P2 opportunities. The "Z" represents the team's goal of zero waste, zero non-compliance and zero water discharge. Specifically, their plan for eliminating wastes includes reducing the solid waste sent to their local landfill to 50 percent by 2008, maintaining and improving their low rates of air emissions and decreasing water usage by recycling. Some of the measures the firm is evaluating to maximize the efficiency of the pot line process include better anode covers, better pot sealing, and reduction of fugitive pot-gas fluoride emissions.

Alcoa's corporate strategy to fully inte-

**Steve Vasco, Environmental Compliance Specialist, and Ron Blain, Environmental Manager, pose at Eastalco's property in Buckeystown. The company is a meticulous caretaker of their 2,200 rolling green acres, and of the historic Carrollton Manor House, which is located on their property. They farm approximately 1,313 acres using soil conservation practices and maintain 300 acres as woodlands, 150 acres of grasslands, and more than 83 acres of streams, grassed waterways and wetlands, which all support a variety of wildlife.**

grate environmental considerations into manufacturing clearly supports this work. "We need to abandon the 'business-as-usual' approach," commented Roberto de

"We have considerable opportunities to reduce pollution through innovations that redesign processes and methods of aluminum operations," he added. "Be assured, we are firmly committed to pursuing all of these opportunities."

All Maryland businesses are eligible for free, confidential, non-regulatory pollution prevention opportunity assessments through an agreement with the Maryland Technology Extension Service. These are not compliance checks, but rather evaluations of waste reduction, cost saving opportunities at your facility.

Call MDE Pollution Prevention Coordinator Laura Armstrong at (800) 633-6101, ext. 4119 for further information on this valuable service or go to [www.mde.state.md.us](http://www.mde.state.md.us) and use search word "Pollution Prevention."

Organizations interested in joining *Businesses for the Bay* can sign up online at [www.b4bay.org](http://www.b4bay.org).

### Member spotlight

Andrade, Alcoa's President - Central Region Primary Metals. "End-of-pipe solutions don't solve problems or save money. In fact, they do the opposite. Eastalco will continue to set clear and ambitious goals, which challenge us to reach beyond our grasp.

## Department adopts CRTK fund regulations

By Patricia Williams

Proposed regulations to implement the filing fees required by the Community Right-To-Know Fund were published in the December 27, 2002 edition of the *Maryland Register*. Maryland Department of the Environment (MDE) adopted these regulations adopted in February, allowing collection of fees for materials held in calendar year 2002. When the inventory reports are received starting this month, the department will use them to prepare an invoice

for each facility's fees. Facilities should NOT submit fees prior to receiving an invoice.

The Community Right-To-Know (CRTK) Fund was established by the legislature to address funding issues surrounding the administration of the federal Emergency Planning and Community Right-to-Know Act (EPCRA) by state and local governments in Maryland. The federal act established an infrastructure for emergency planning, preparedness, and response at all

level of government. It accomplished this by requiring states to establish a State Emergency Response Commission (SERC), to designate planning districts, and to appoint Local Emergency Planning Committees (LEPCs) for each district. To provide the government with the information needed for planning, EPCRA contains chemical inventory and release reporting obligations for covered industries. States and LEPCs are required to collect this in-

See FUND, Page 4

# Noland, Nielsen & tributary team members earn awards

Volunteer community members who give their time to clean local waterways, restore local rivers, and protect the Chesapeake Bay received awards at the 7th Annual Tributary Team Meeting held Feb. 1 in Baltimore.

Maryland's Tributary Teams, composed of 350 participants, were established in 1995 to bring Chesapeake Bay cleanup goals to the local level and encourage all stakeholders to actively participate in the restoration of their local rivers and the Chesapeake Bay.

Melvin Noland, a retired C&P Telephone official, is wild about trees and the positive impact they have on our communities. Noland has planted thousands of trees that have improved natural habitat, beautified communities, and provided living classrooms for students and adults alike.

In recognition of his outstanding volunteer contributions to help the Bay, the Chesapeake Bay Trust presented Noland with the 2003 Ellen Fraites Wagner Award at the meeting. Named in honor of former Governor Harry Hughes' staff member who helped form the Trust, the award is a statue of a blue heron, the symbol of the Trust and an icon of the Bay.

The award was presented at a luncheon ceremony by Dr. Torrey Brown, former Maryland Department of Natural Resources Secretary and long-time Trust Board member, and Midgett Parker, Jr., Esq., vice chairman of the Board of Trustees. "Mr. Noland has lit a spark under hundreds of resource professionals and volunteers," said Parker. "He exemplifies the mission of the Chesapeake Bay Trust - promoting public awareness and involvement in the restoration and protection of the Chesapeake Bay and its tributaries."

A volunteer with the Baltimore County Forestry Council since 1978, Noland contributes more than 1,500 volunteer hours each year promoting tree planting and wise forest management in Baltimore County. He has facilitated hundreds of tree plantings, pioneered school-based tree grow-out stations now used throughout the state, and conducted countless workshops. Noland has worked tirelessly with educators, helping to develop both the Schoolyard Reforestation/ Wildlife Habitat Manual and an instructional video entitled More Trees, Please. He has also been a key figure in the Chesapeake Bay Reforestation and Class Tree Programs, through which almost all of Baltimore County's 150 elementary, middle, and high schools have planted more than 3,000 trees. He

is currently working with the Department of Natural Resources to develop an outdoor environmental education center in the Days Cove area of Gunpowder State Park in central Maryland.

Each year individual volunteer team members are honored for their contributions to the Team's efforts to clean local waterways. The following is a list of this year's award winners.

**Bernie Fowler Award Winner** - For demonstrating extraordinary commitment, effort and dedication to the Tributary Team mission and protecting and restoring the Chesapeake Bay and its tributaries, the Bernie Fowler award is given in honor of former St. Sen. Bernie Fowler's continued efforts to clean up the Patuxent River and the Chesapeake Bay. Awardees are selected by the Chairs of Maryland's 10 Tributary Teams.

The 2003 award was presented to **Patricia Nielsen of Centreville**, member of the Upper Eastern Shore Tributary Team. Ms. Nielsen is a remarkable woman whose drive, energy, and persistence have resulted in great strides and partnerships in restoring and protecting the Chester River and the Upper Eastern Shore Watershed. She was a founding member of both the Upper Eastern Shore Tributary Team and the Chester River Association. Ms. Nielsen's accomplishments include:

In May 2000, Nielsen initiated the team's Corsica River Conservation Landscaping Project. For this project, she was instrumental in establishing partnerships with the team, the Chester River Association, U.S. Fish and Wildlife Service, Queen Anne's County Extension Service, the Maryland Cooperative Extension Master Gardeners, the Critical Area Commission, and the Town of Centreville to host an eight part seminar series for local gardeners focused on the ecosystem dynamics of native landscapes. This core group of participants went on to install a native plant garden at the gateway of Centreville on Route 213 South.

Nielsen engaged Chester River Association members in the Upper Eastern Shore Tributary Team Living Shorelines Forum. She used her expertise in writing and graphic design to prepare letters to elected officials and invitations to watershed associations within the Upper Eastern Shore watershed. As a result, more than 200 people attended the forum, including elected officials, state agency representatives, and community leaders.

**2002 Tributary Team Awardees** - Each Tribu-

tributary Team presents an award to a member that goes above and beyond the call of duty, furthering the Team's work to restore the Chesapeake Bay and its tributaries. The recipients by team are:

**David Harris, Henderson** - Harris received the **Choptank Tributary Team Award** for creating and participating on the Public Drainage Association Task Force and identifying effective solutions to public drainage ditch issues.

**Mitch Keiler, Queenstown** - Keiler received the **Upper Eastern Shore Tributary Team Award** for helping re-energize the Upper Eastern Shore Team through his dedication and enthusiasm in educating the team and increasing their awareness about the importance and challenges associated with shoreline stabilization. Mr. Keiler also helped to galvanize the team's efforts to establish a Living Shorelines

Workgroup, which hosted a highly successful public forum.

**Donald Outen, Towson** - Outen received the **Upper Western Shore Tributary Team Award** for his long-standing commitment to Maryland's Tributary Teams as demonstrated by his participation in activities and committees that have benefited from his extensive knowledge in land use and environmental protection.

**Hilari Benson Varnadore, Frederick** - Varnadore received the **Upper Potomac Tributary Team Award** for organizing the 3rd annual Monocacy River Paddle — a five-day, 58-mile spring sojourn that includes daytime environmental education for middle school students and night time potluck dinners with conservation lectures and discussions.

**Frederick Tutman, Upper Marlboro** - See AWARDS, Page 6

## News Briefs

### Virginia considers new Bay oyster project

Virginia officials are poised to introduce up to a million Asian oysters into the Chesapeake Bay, despite warnings from scientists and federal agencies that their experiment to save the beleaguered seafood industry could go badly awry. The Virginia Marine Resources Commission voted recently to support a proposal by

seafood processors to raise the Asian oysters in controlled settings to see whether restaurants and other customers will buy them. The trial could start in June if appeals by federal agencies do not hold up the project. The Asian oyster, *Crassostrea ariakensis*, looks and tastes much like the native Eastern oyster. Previous tests have shown that it grows faster and is resistant to the diseases that have ravaged the

bay's oyster population. Virginia backers hope to pave the way for revival of that state's oyster industry, which disease has driven to the brink of collapse. Maryland's watermen and seafood industry, facing a record-low harvest this year, are pressing for similar studies. "The reality is, if you don't do anything, there won't be any industry left to save in either state," said Wilford Kale, spokesman for the commission, which

regulates Virginia fisheries.

### Bill seeks to cap pollutants

Emissions of two common pollutants from coal-fired power plants would be capped starting in 2008 under legislation proposed by a Bowie delegate.

The legislation, proposed by Delegate James Hubbard, D-Bowie, comes on the heels of EPA See BRIEFS, Page 5

# WETLANDS

Continued from Page 1

existed before European settlement. These important resources continue to be lost nationally at a rate estimated to be hundreds of thousands of acres per year due to both human activity and natural processes. Since colonial times, Maryland has lost an estimated 820,000 acres of wetlands. Approximately 96 percent of these wetlands are located in the Maryland portion of the Chesapeake Bay watershed. In order to offset this loss, the state has set two wetland restoration goals and is well on its way to meeting them.

In 1997, an executive order from the governor established that all state agencies shall actively pursue wetland restoration projects on their lands where feasible, and give priority to managing policies that pro-

mote wetland restoration, in order to reach the state's 60,000 acre restoration goal.

"In Maryland, restoration of wetlands involves several approaches," said Bob Summers, director of the Maryland Department of the Environment's Water Management Administration. "These include the re-establishment of wetlands on sites where they used to exist; the enhancement of existing degraded wetlands; and, the creation of wetlands on marginal lands where they did not previously exist."

For example, the removal of drainage structures from certain agricultural fields can return water to the surface of the ground, resulting in the restoration of a wetland that was there before the farm.

Recognizing the vital importance wet-

lands play to the overall health of the Chesapeake Bay, Maryland, Pennsylvania, Virginia, the District of Columbia and the U.S. Environmental Protection Agency signed the 2000 Chesapeake Bay Agreement. The Agreement includes goals for voluntary wetland restoration, based in part on Maryland's goal. An interim goal of 25,000 acres of wetland restoration for the Chesapeake Bay watershed was set for 2010. Maryland's share of that goal is 15,000 acres. As of December, more than 11,000 acres of wetlands have been restored. The majority of this wetland restoration acreage is in Worcester, Somerset and Dorchester counties.

"Maryland is committed to meeting these goals and in developing innovative solu-

Above is the Adkins wetland along Route 376 in Worcester County.

tions and partnerships for sound wetland stewardship and restoration," Summers added.

# FUND

Continued from Page 2

formation annually. LEPCs must prepare a response plan and exercise that plan annually; however, EPCRA provided no money to support this mandate.

Maryland Emergency Management Agency (MEMA) is the lead agency for the SERC in Maryland. The SERC designated the 23 counties, Baltimore City, and Ocean City as planning districts and appointed an LEPC for each district. MDE was designated as the repository for all reports that are filed with the SERC as a result of this program. The level of activity for an individual LEPC and MDE in fulfilling the obligations of the federal act is a direct reflection of the availability of funds to support the data collection, data management, training, and planning activities. Historically, there have been small annual grants available for LEPCs from the U.S. Department of Transportation and the Federal Emergency Management Agency. The amount available varies from year to year and is dependent on the allocation made to the state by the federal programs. MDE is not eligible for these grants as they are specifically for training and planning activities not data management.

The CRTK Fund fees apply only to those facilities covered by the federal EPCRA reporting requirements. Under the legislation, fees are assessed to facilities for reports filed with MDE pursuant to Section 312 (Emergency and Hazardous Chemical Inventory Reporting) and 313 (Toxic Release Inventory reporting) of EPCRA. There is an application fee of \$100 per facility for each type of report. Owners/Operators of one or more facilities in Maryland will pay no more \$1,000 annually to the fund. The cap is a combined total for both programs. In other words, an owner/operator that remits \$1,000 in fees for the Section 312 report in March will not pay any fees associated with Section 313 reports in July. The department anticipates that the average Section 312 facility will pay \$300 to the Department each year. The enabling legislation allows the department to exempt facilities from payment

of fees. Government agencies, charitable organizations, farmers, gasoline retailers, and marinas are not subject to the fees. Please note, while marinas are exempt from paying CRTK fees, they must still report provide chemical inventory reports as required under the federal law.

## Section 312

### Emergency & Hazardous Chemical Inventory Reporting

Reports are due on March 1<sup>st</sup> each year and cover those materials at the facility in excess of federal thresholds during the previous calendar year. When MDE receives the report, it will generate an invoice to the company for payment. Companies should NOT submit their payment with the report, but should wait to be invoiced. There is a \$100 application fee for each facility required to submit a chemical inventory report. The inventory fees for Section 312 uses the quantity and level of threat posed by the materials present at an individual facility to determine the total fee for that facility. The ranges use the reporting range codes from the federal program. The fee amounts for each type of substance are outlined in Tables 1 and 2. The tables are provided to allow facilities to estimate their fee obligation. Remember, fees should not be paid until a bill is received from MDE.

## Section 313 Toxic Release Inventory Reporting

Reports and fees for Section 313 are due on July 1<sup>st</sup> each year and cover releases, transfers, and other activities with listed toxic chemicals during the previous calendar year. There is an application fee of \$100 for each covered facility. The type of reports submitted by each facility to MDE during a calendar year determines inventory fees for Section 313. Fees for each type of report are outlined in the Table 3.

Questions about EPCRA reporting in general or the Community Right-to-Know Fund should be directed to Patricia Williams at (410) 537-3800 or at the following email address [pwilliams@mde.state.md.us](mailto:pwilliams@mde.state.md.us).

# Salisbury is first city to try curbside *eCycling*

By Bill Schmidt

Salisbury, a city in Wicomico County, is known as the "hub of the Shore." Although Salisbury is relatively a small town with a population of about 24,000, it is one of the largest towns on Maryland's rural Eastern Shore. In spite of not being required to recycle under Maryland's Recycling Act, Salisbury has been serving its residents with curbside recycling since 1999. The effort began with private haulers in 1999, and in 2001, the Salisbury Department of Public Works (DPW) took over curbside recycling servicing to the city's 8,750 residences.

In January, Salisbury launched something even more unique. On two Saturdays following the Christmas and New Year's holidays, Salisbury conducted a special curbside *eCycling* program. Though not realized at the time, that was the first curbside *eCycling* program in both Maryland and in the U.S. Environmental Protection Agency's Region III, which includes Pennsylvania, Delaware, Maryland, Virginia, West Virginia and the District of Columbia.

*Ecycling* is the electronics collection. Nationally, more than 20 million personal computers became obsolete in 1998. That number is expected to grow to an estimated 315 million by 2004. Additionally, obsolete electronics contain elements such as lead, mercury, cadmium, and arsenic. If not handled properly, these toxic substances can be released into the environment. *eCycling* pro-

grams offer long-term solutions to end-of-life electronics management to all Marylanders by collecting items such as televisions, computers, monitors, printers, keyboards, and scanners.

"Choosing *eCycling* just made sense," said John Jacobs, director of the Salisbury's DPW. "It helps the community and it was just the right thing to do!"

Salisbury's Recycling Coordinator Michelle Malone and the Recycling Task Force, which consists of four active and dedicated citizens, spearheaded the coordination and planning of the event. The Maryland Department of the Environment contributed technical and promotional assistance to the DPW.

DPW collected about 6,000 pounds on the first day, Jan 4., and about the same amount the second day, Jan. 11, for a total of approximately 6 tons of recyclables. These results were great for a town's ini-

MDENVIRONMENT PHOTO BY BILL SCHMIDT

**Salisbury's Recycling Coordinator Michelle Malone is surrounded by televisions and computers collected at the first ever curbside *eCycling* event in Maryland.**

tial *eCycling* attempts.

"I am very excited about the success of the city's *eCycling* event," Malone said, "and am looking forward to providing this service to our residents in the future."

"The program was an outstanding suc-

cess, well worth the expense," Jacobs added. As a result of the success of the program and strong public support for recycling electronics, the DPW is recommending to the Mayor and City Council that curbside *eCycling* be considered again next year.

## BRIEFS Continued from Page 3

Administrator Christie Whitman's appearance at the State House recently to promote the Bush administration's Clear Skies initiative.

That initiative and other federal government programs aren't doing enough to curb air pollution, Hubbard said.

Pollution drifting in from the Ohio Valley is a particular concern, he said, and Maryland will have to work harder to meet federal air quality standards because of it.

"If we're not going to have a federal policy

(that solves this), then unfortunately the only way we're going to get attainment is through our own policy," he said.

Hubbard's legislation targets two pollutants - sulfur dioxide, a major component in acid rain, and nitrogen oxide, which creates both ground-level ozone and nitrogen pollution in the Chesapeake Bay. Hubbard's proposal would introduce the caps in two stages, phasing in the nitrogen oxide cap between 2008 and 2010, and the sulfur dioxide cap between 2010 and 2014.

Companies that produced more than 75,000 tons of nitrogen oxide in 2000 would have to reduce that to less than 31,000 by 2010, while companies under the 75,000-ton limit in 2000 would have to cut back to under 25,000 tons by 2008.

For sulfur dioxide, the dividing line would be 225,000 tons, with companies above that level being limited to 80,000 tons by 2014 and companies under 225,000 tons being limited to 50,000 tons by 2014.

# Enforcement & Compliance Notes

--January 15 to February 15, 2003--

## Air & Radiation Management Administration

**Schlumberger Malco Plastics (Schlumberger) – Baltimore County**--On January 14<sup>th</sup>, MDE received payment of a \$10,000 penalty as required by a Notice of Assessed Civil Penalty issued by MDE to Schlumberger. Schlumberger operates a commercial credit card manufacturing facility. The Company failed to maintain records of maintenance, operator training, fuel usages and VOC-containing materials as required in its Title V permit to operate. The violations have since been corrected. **Status:** Case Closed. (Reference #AQCP 02-05A)

**Gamse Lithographing Company, Inc. – Baltimore County**--On January 17<sup>th</sup>, MDE signed a Consent Agreement with Gamse Lithographing Company (Gamse) to resolve violations of air quality requirements. Gamse operates a commercial printing facility that failed to maintain the proper temperature on its air pollution control device as required in its air quality Permit to Operate. Improper operation of the control device results in excess VOCs being emitted into the air. In addition to agreeing to pay a penalty of \$7,250, Gamse agreed in the Consent Agreement to implement additional measures to ensure future compliance. The violations have since been corrected and the new measures implemented. **Status:** Gamse has 30 days to pay the penalty. (Reference #AQCP 02-08A)

**Support Terminal Operations Partnership, L.P. (ST Services) – Wicomico County**--On January 17<sup>th</sup>, MDE received payment of a \$20,500 penalty as required by a Notice of Assessed Civil Penalty issued by MDE to ST Services. ST Services operates a bulk petroleum marketing terminal located in Salisbury. The Company failed to perform monitoring and record keeping activities required in its air quality Permit to Operate. The violations have since been corrected. **Status:** Case Closed. (Reference #AQCP 02-10A)

**J. V. Wells Lumber, Inc. – Wicomico County**--On January 30<sup>th</sup>, a Consent Agreement between J. V. Wells and MDE was signed. J. V. Wells owns and operates a commercial sawmill on Maryland's Eastern Shore. J. V. Wells violated air quality requirements by failing to obtain a permit to construct for a new boiler and for violating visible emissions regulations at the other

two boilers. In the Agreement, the Company agreed to make improvements to its boilers to achieve compliance with air quality requirements and to pay a penalty of \$3,500 for past violations. As required by the Agreement, improvements to the boilers will be completed by the end of March 2003. **Status:** J. V. Wells has 30 days to pay the penalty. (Reference #AQCP 01-27)

**Darling International, Inc. – Dorchester County**--On February 6<sup>th</sup>, MDE issued an Assessed Administrative Penalty in the amount of \$12,500 to Darling International for air quality violations at its poultry rendering plant in Dorchester County. Darling violated air quality regulations by installing and operating a feather hydrolizer without first obtaining a permit to construct and a permit to operate from MDE. **Status:** Darling has 30 days to request a hearing. (Reference #AQCP 02-09A)

**Baltimore Spice – Baltimore County**  
On February 12<sup>th</sup>, MDE signed a Consent Order with Baltimore Spice to address air quality violations at its Owings Mills spice manufacturing facility. In the Order, Baltimore Spice agreed to pay a penalty of \$25,000. The Company was cited for installing equipment without first having the required permits, failure to submit an emission certification report and air toxics analysis, failure to operate air pollution control equipment within specified parameters, and failure to comply with federal air toxics reporting requirements. The violations cited in the action have since been resolved. **Status:** Baltimore Spice has 30 days to pay the penalty. (Reference #AQCP 01-36)

## Waste Management Administration

**Myung D. and Duk H. Ro - 1 affected property - Frederick County** - Myung D. and Duk H. Ro were issued a Complaint, Order and \$10,000 Civil Penalty on January 27 for violating Maryland's Lead Laws by failing to register a pre-1950 rental unit and failing to obtain risk reduction certificate(s) of lead inspection compliance. **Status:** Myung D. and Duk H. Ro have 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the Penalty. (Reference # 02-10-5039)

**Aim Investments, Inc. - 12 affected properties - Baltimore City** - Aim Investments, Inc. was issued a Complaint, Order and \$40,000 Civil Penalty on January 30 for violating Maryland's Lead Laws by failing to

register pre-1950 rental units and by failing to obtain risk reduction certificate(s) of lead inspection compliance. **Status:** Aim Investments, Inc. has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the Penalty. (Reference #01-30-4856)

## Water Management Administration

**Frederick County Division of Utilities and Solid Waste Management – Frederick County** – On January 24, 2003, MDE and Frederick County finalized an administrative consent order regarding improvements to the New Market Wastewater Treatment Plant. Under the terms of the consent order, Frederick County has agreed to submit plans and complete repairs, including the relocation of the wastewater treatment plant's 001 Outfall to ensure compliance with effluent limits established by the NPDES Permit. The consent order establishes milestones for accomplishing corrective work, interim performance standards, and stipulated penalties for violations of the terms of the consent order. **Status:** Case Closed. (Reference #CO-03-0175).

## AWARDS Continued from Page 3

Tutman received the **Patuxent River Commission Award** for supplying his talent and expertise in multi-media production to create riparian buffer videos for the commission.

**Pamela Rowe, Rockville** - Rowe received the **Middle Potomac Tributary Team Award** for her service as chair of the team's Public Outreach and Education Workgroup, for being a major force in organizing the team's successful Fish-In and Wade-In public outreach events.

**Matthew Hedger, Salisbury** - Hedger received the **Lower Eastern Shore Tributary Team Award** for coordinating a successful tree grow-out station with Parkside High School in Wicomico County where students potted and grew more than 400 seedlings and planted them on their school grounds and at an additional school.

**Michele Parlett, Newburg** - Parlett received the **Lower Potomac Tributary Team Award** for the many environmental stewardship programs she organized during her tenure on the Middle Potomac Team.

**Stuart Stainman, Baltimore** - Stainman received the **Patapsco/Back Tributary Team Award** for his commitment to the Tributary Team, its events, and fellow members. He coordinated the team's annual Secchi Dip-In and planned a highly successful event that included 20 simul-

**Town of Accident – Garrett County** – On January 23, 2003, MDE finalized an administrative consent order regarding improvements to the Accident Wastewater collection system. Under the terms of the consent order, Accident has agreed to submit plans and complete repairs, including inflow and infiltration reduction and limit approval of new building permits for connection to the sewer system to prevent high flows that contribute to violations of permitted effluent limits. The consent order establishes milestones for completing corrective work, interim performance standards and stipulated penalties for violations of the terms of the consent order. **Status:** Case Closed (Reference #CO-03-0064).

## Water and Sediment Pollution Penalties – Statewide

During the period January 15 to February 15, 2003, MDE collected an additional \$21,616 to the Clean Water Fund in settlement of alleged water pollution violations from ten establishments. MDE also collected an additional \$2,750 in administrative penalties to the Sediment Fund in settlement of alleged sediment and erosion control violations from two facilities.

taneous Secchi dip-ins across the watershed.

**Bob and Eleanor Dickmann, Rose Haven** – The Dickmanns received the **Lower Western Shore Tributary Team Award** for the steadfast environmental leadership they exhibited in their community. The Dickmanns also worked with other members of the Herring Bay Clean Water Initiative to spearhead the Oyster Recovery project in Herring Bay that has created and annually seeds a 1.2 acre oyster bar.

## BUHL

the Ehrlich administration.

Buhl, 48, is the former Director of Southeast Offices for the Michigan Department of Environmental Quality. In her capacity as a director, she was responsible for the oversight of two district offices, as well as the coordination of department activities, projects and initiatives. She also served as a liaison to local government officials to ensure consistency across department programs.

Buhl served as the Senior Staff Counsel for Environmental Legal Affairs at the Chrysler Corporation from 1988-1999. Her major accomplishments there included participation in sev-

See ACTING, Page 12

# DEPUTY

Continued from Page 1

sponsible for a broad range of matters including coordination of environmental assessments and investigations, and the development, approval and implementation of remediation activities for environmentally impacted properties like Empire Centre in Burbank, California and the ICON Building in Lake Success, New York.

Empire Centre was an aircraft production facility for several decades and where Lockheed Martin began. The site had a wide range of contamination issues but is now a multi-use commercial area with two hotels, three office complexes and retail shopping. The ICON site had groundwater contamination problems but is now a high tech office park.

"Those projects contributed greatly to the communities in which they occurred," he said. "These are the kinds of things I've had satisfaction in doing...partnerships between public and private sector where everybody won by cleaning up some contaminated sites, providing high paying jobs and generating greater tax revenue for the communities."

The University of Richmond graduate was instrumental in forging effective working relationships with local and state environmental regulators, elected officials, environmental groups and community leaders in accomplishing those redevelopment tasks. It's a mission he hopes to continue.

"Through a balanced interpretation of the laws we can be business friendly and still be protective of the environment," Philbrick said. "Companies want to be where they can be validated, grow and be successful. Four years goes by quick and we have to change the perception that Maryland's environmental policies makes it difficult to do that."

Philbrick's previous employment includes stints as Director of Corporate Real Estate for Colgate Palmolive Company from 1986 to 1992 and Director of Corporate Real Estate for American Can Company from 1980 to 1986. He received his Masters in Business Administration from the University of Chicago.

The Deputy Secretary resides in Fallston with his wife, Cynthia, and is a proud grandfather.

MDE's programs include air quality control of stationary and mobile sources, management of hazardous and solid waste, oil control, regulation of wastewater discharges and public drinking water, wetlands protection, environmental risk assessment, and financial assistance for environmental restoration.

## Jurisdictions sign reservoir pact

The Carroll County commissioners and others reaffirmed a 19-year-old agreement Feb. 24 that was originally written to preserve and protect drinking water supplies for more than a third of Maryland's residents. MDE Acting Secretary Lynn Y. Buhl, left, Baltimore Mayor Martin O'Malley, second from left, Baltimore County Executive Jim Smith and other regional officials joined commissioners Julia Gouge, third from left, Perry Jones Jr., and Dean L. Mlnnich, right, in signing the Reservoir Watershed Protection Agreement, which limits development in 291,000 acres surrounding the Liberty, Pretty Boy and Loch Raven reservoirs.

## Public meetings & hearings

### Waste Management Administration

**March 6**—5:30 p.m. Western Heights Middle School Cafeteria, 1300 Marshall Street, Hagerstown; Public availability session to discuss upcoming investigation and cleanup of Central Chemical site. For more info call Rick Grills at (410) 537-3440

**March 13**—9 a.m. to Noon. MDE, Potomac Conference Room, 1800 Washington Boulevard, Baltimore; Meeting of the Controlled Hazardous Substances Advisory Council. For more info call Emmanuel Ofoche at (410) 537-4460.

**March 18**—7 p.m. Mt. Airy Branch, Carroll County Public Library, 705 Ridge Avenue, Mt. Airy; Informational meeting regarding NPDES permit renewal application for Colonial Pipeline Company's facility in Woodbine. For more info call Gail Castleman at (410) 537-3314 or Al Simkins at (410) 537-3386.

**March 24**—6:30 p.m. Lexington Park Library, 21677 FDR Blvd. (off Shangri-La Drive), Lexington Park; Informational meeting followed by a public hearing regarding

MDE's tentative determination to not renew the State Groundwater Discharge permit for the closed rubble cell at the St. Andrews Municipal Landfill. For more info call Gail Castleman, (410) 537-3314 or Kassa Kebede, (410) 537-3375.

### Water Management Administration

**March 6**—7 p.m. Kent Island High School, Stevensville; Public meeting for Nontidal Wetlands Permit Application Number 01-NT-2217/200060465 and Tidal Wetlands Permit Application Number 00-WL-0706/20060468. K. Hovnanian/Four Seasons Project on Kent Island. Proposed is the construction of an upland residential community adjoining Cox Creek, Macum Creek and the Chester River. The project is located on 562 acres of land off of Castle Marina Road on Kent Island. For more info call Stanley Causey at (410) 901-4043 or Chris Pajak at (410) 543-6703.

**March 13**—6 p.m. Hancock Town Hall Meeting Room, 126 W. High Street, Hancock; Public hearing on the tentative determination for Donnelly Bohrer, Permit #03-DP-3420 to discharge an average of

1,000 gallons per day of treated domestic wastewater from a proposed Woodmont Quik Stop wastewater treatment system into the Little Tonoloway Creek designated as USI-P waters – protected for water contact recreation, aquatic life and public water supply. For more info call Stephen Luckman at (410) 537-3671.

### Environmental Justice Commission meets

The next regular meeting of the Commission on Environmental Justice and Sustainable Communities will be held March 26 from 9:30 am to 1:30 p.m. in the Aeries Conference Room at the Maryland Department of the Environment's headquarters located at 1800 Washington Boulevard in Baltimore. At that time local planning representatives will consider and begin identifying areas where environmental justice issues can be incorporated into local government operations. For more info call Andrew Sawyers at (410) 537-3084.

\*\* Persons needing special accommodation are encouraged to contact MDE's Fair Practices Offices at (410) 537-3964 five days prior to the event.

# For the Record

The following is a partial list by county of applications received by MDE and other permitting activity between January 16 and February 15, 2003. For more information on these permits, please contact MDE's Environmental Permit Service Center at (410) 537-3772.

## Allegany

CFA-NC TOWNRIDGE SQUARE LLC, 5200 Buffington Road, Atlanta, GA 30349. Voluntary Cleanup Program application seeking a Certificate of Completion as an inculpable person for a 0.93-acre portion of the CSX Former Bolt and Forge property located at Williams Street and Maryland Avenue, Cumberland, MD 21502

CITY OF FROSTBURG - P.O. Box 440, Frostburg, MD 21532. (03-1008) Water permit to provide covers for the Water Treatment Plant Reservoir and upgrade security system

## Anne Arundel

ANNE ARUNDEL COUNTY DEPARTMENT OF PUBLIC WORKS - 2662 Riva Road, Annapolis, MD 21401. (03-1011) Sewerage permit to upgrade the Broadwater Water Reclamation Facilities at Shady Side Road and Deep Cove Road, Churchton

HARTGE YACHT YARD - 4880 Church Lane, Galesville, MD 20765. (2003-OPT-1110) Oil operations permit for above ground storage tank and transportation

JACK THE GREEK GARAGE - 1920 West Street, Annapolis, MD 21401. (TR7946) An air permit to construct for one paint spray booth

JOHN W. RITTER TRUCKING, INC. - 8271 Brock Bridge Road, Laurel, MD 20701. (2003-OPT-6467) Oil operations permit for above ground storage tank and transportation

NORTHROP GRUMMAN ELECTRONIC SYSTEMS - 1212 Winterson Road, Linthicum, MD 21090. (TR7955) An air permit to construct for one etcher and one gas reactor column

RELIABLE CONTRACTING COMPANY, INC. - 101 Rear Dover Road, Glen Burnie, MD 21061. (TR7952) An air permit to construct for modification to asphalt plant

RELIABLE CONTRACTING COMPANY, INC. - 2641 Brickhead Road, Gambrills, MD 21054. (TR7951) An air permit to construct for one asphalt tank

THE BELLE GROVE CORPORATION - Baltimore, MD (77-SP-0074-2) Renewal for a surface mine permit located on Route 648

US AIR FORCE / 89 CES / CEV - 3479 Fetchet Avenue, Andrews AFB, MD 20762. (03-1013) Sewerage permit to replace the Davidsonville Wastewater Treatment Plant at Bottner Road, Davidsonville

## Baltimore City

AMERICAN YEAST CORPORATION - 8215 Beachwood Road, Baltimore, MD 21222. (2003-OPT-2024) Oil operations permit for above

ground storage tank and transportation

DORACON CONTRACTING, INC. - 3500 East Biddle Street, Baltimore, MD 21213. (TR7939) An air permit to construct for one portable crushing & screening plant

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE - 733 North Broadway, Baltimore, MD 21205. (TR7950) An air permit to construct for one emergency generator

JOHNS HOPKINS UNIVERSITY, THE - 3400 North Charles, Baltimore, MD 21218. (TR7943) An air permit to construct for one boiler > 50 MMBtu

LENMAR, INC. - O'DONNELL STREET - 4701 O'Donnell Street, Baltimore, MD 21224. (2003-OPT-2975) Oil operations permit for above ground storage tank and transportation

NORFOLK SOUTHERN RAILWAY COMPANY - BAYVIEW YARD - 7210 Rolling Mill Road, including 6000 East Lombard St., Baltimore, MD 21224. (2003-OPT-2251) Oil operations permit for above ground storage tank and transportation

P. FLANIGAN & SONS INC. - WESTPORT - 2120 Annapolis Road, Baltimore, MD 21230. (2003-OPT-2065) Oil operations permit for above ground storage tank and transportation

RITCHIE LAND RECLAMATION LP - 1030 Edison Highway, Baltimore, MD 21213. (TR7912) An air permit to construct for one portable crusher

## Baltimore County

BALTIMORE COUNTY DEPARTMENT OF PUBLIC WORKS - 111 W. Chesapeake Avenue, Towson, MD 21204. (03-1016) Sewerage permit to construct the Rocky Point Wastewater Pumping Station at Back River Neck Road, 150 feet NW of Barrison Point Road

BALTIMORE COUNTY DEPARTMENT OF PUBLIC WORKS - 111 W. Chesapeake Avenue, Towson, MD 21204. (03-1023) Sewerage permit to construct low pressure sewer system along Back River Neck Road and Barrison Point Road

SHA - HEREFORD SHOP - 306 Mount Carmel Road, Parkton, MD 21120. (03DP3440) Surface industrial discharge permit

## Caroline

ELIZABETH ELLEN ELLWANGER, CR-104 - 12640 Kibler Road, Greensboro, MD 21639. Sewage sludge application on agricultural land

## Carroll

CITY OF WESTMINSTER DEPARTMENT OF PLANNING AND PUBLIC WORKS - P.O. Box 710, Westminster, MD 21158. (03-1001) Sewerage permit to replace chlorination and dechlorination facilities at the Westminster Wastewater Treatment Plant

MARYLAND ENVIRONMENTAL SERVICE - 2011 Commerce Park, Annapolis, MD 21401. (03-1021) Water permit to lay water mains along MD Route 32 and Main Street, Sykesville

TEVIS OIL, INC. - 82 John Street, Westminster, MD 21157. (2003-OPT-4506) Oil operations permit for above ground storage tank and transportation

TOWN OF MT. AIRY - 110 South Main Street, Mt. Airy, MD 21771. (03-1015) Sewerage permit to upgrade the Wastewater Pumping Station No. 5, at Prospect Road & Prospect Avenue Park

## Cecil

BUILDER'S FIRSTSOURCE - 18 Industrial Drive, North East, MD 21901. (2003-OPT-6301) Oil operations permit for above ground storage tank and transportation

CECIL COUNTY DEPARTMENT OF PUBLIC WORKS - 129 E. Main Street - Room 308, Elkton, MD 21921. (03-1020) Sewerage permit to construct a force main along Carpenters Point Road

IONICS, INCORPORATED, 65 Grove Street, Watertown, MA 02472-2882. Voluntary Cleanup Program application seeking a No Further Requirements Determination as a responsible person for a 19.0-acre Ionics, Incorporated property located at 801 Elkton Boulevard, Elkton, MD 21921

SANDY HILL HOLDINGS, LLC. - 3380 Turkey Point Road, North East, MD 21901. (03-1003) Sewerage permit to construct wastewater treatment facilities at the Sandy Hill Camp located on Turkey Point Road (MD Route 272), 2/3 mile south of Old Elk Neck Road

TOWN OF ELKTON - 100 Railroad Avenue, Elkton, MD 21921. (03-1006) Sewerage permit to construct interceptor sewers along Route 40

TWO RIVERS YACHT BASIN LTD. - 64 Two Rivers Lane, Chesapeake City, MD 21915. (2003-OPT-2903) Oil operations permit for above ground storage tank and transportation

## Charles

BARDON, INC. - La Plata, MD (03-SP-0611) Permit application for a surface mine located MD Route 6

CHARLES COUNTY ASPHALT INC., LLC - 12455 Billingsley Road, Waldorf, MD 20602. (2003-017-00119) Air quality permit to operate

CHARLES COUNTY PUBLIC SCHOOLS - 5980 Radio Station Road, P. O. Box D, La Plata, MD 20646. (03-1014) Sewerage permit to construct a wastewater treatment plant to serve the Piccowaxen Middle School and the Thomas L. Higdon Elementary School, at MD Route 257 and Republic Road

GERALD H. HELWIG, CH-015 - 3900 Helwig Farm Road, Nanjemoy, MD 20662. Sewage sludge application on agricultural land

TGM MARYLAND CORP, CH-93 - Corner of Route 224 and Route 344, Chicamuxen, MD 20640. Sewage sludge application on agricultural land

WALTER GOLDEN PROPERTY, CH-033 - 9125 Ironsides Road, Nanjemoy, MD 20662. Sew-

age sludge application on agricultural land

## Dorchester

RUSSELL BAKER III, DR-64 - 4900 Block of Percy May Road, Vienna, MD 21869. Sewage sludge application on agricultural land

## Frederick

FREDERICK COUNTY DIVISION OF UTILITIES AND SOLID WASTE MANAGEMENT - Winchester Hall, 12 East Church Street, Frederick, MD 21701. (03-1005) Water permit to upgrade the Francis Scott Key Water Treatment Plant for recommission

FREDERICK COUNTY LAW ENFORCEMENT - 110 Airport Drive East, Frederick, MD 21705. (2003-OPT-15367) Oil operations permit for above ground storage tank and transportation

FREDERICK COUNTY MOTOR POOL FACILITY - 331 Montevue Lane, Frederick, MD 21702. (2003-OPT-15366) Oil operations permit for above ground storage tank and transportation

RANDALL & FRANCES WILLIAMS RESIDENCE - 4310 Buckeystown Pike, Frederick, MD 21704. (03DP3256) Groundwater municipal discharge permit

RICHARD F. KLINE, INC. - FREDERICK - 7700 Grove Road, Frederick, MD 21704. (2003-OPT-3424) Oil operations permit for above ground storage tank and transportation

WOLFE & SON, INC. - FREDERICK - 811 East South Street, Frederick, MD 21701. (2003-OPT-6745) Oil operations permit for above ground storage tank and transportation

## Garrett

CLAYBURN, INC. - 16306 Bittinger Road, Grantsville, MD 21536. (2003-023-00026) Air quality permit to operate

DEEP CREEK LAKE WWTP - 762 Mayhew Inn Road, Oakland, MD 21550. Sewage sludge transportation permit

DEEP CREEK LAKE WWTP - 762 Mayhew Inn Road, Oakland, MD 21550. Sewage sludge transportation permit

GARRETT COUNTY SANITARY DISTRICT, INC. - 14689 Garrett Highway, Oakland, MD 21550. (03-1000) Sewerage permit to upgrade the Deep Creek Lake Wastewater Treatment Plant

GORMAN WASTEWATER TREATMENT PLANT - 338 Steyer Gorman Road, Gorman, MD 21550. (03DP2177) Surface municipal discharge permit

QUEST INDUSTRIES, LLC - 10801 Laurel Hill Drive, Frostburg, MD 21532. (TR7948) An air permit to construct for eight printers and two coating lines

# ACTING

Continued from Page 6

eral brownfields projects involving the deactivation and demolition of obsolete plants, as well as the redevelopment of those facilities in significant urban locations. Chrysler was regarded as a national leader in brownfields redevelopment much to Buhl's credit.

The Acting Secretary, during her tenure at the Michigan Department of Environment, worked closely with a U.S. District Court Judge to forge an effective working relationship with the state's environmental agency and the federal court in the wake of problems with the Detroit Water and Sewerage Department.

Her environmental activism was highlighted by her work as a volunteer for a group that raised funds to address environmental issues for a spring-fed lake in rural northern Michigan. The lake was threatened by stormwater run-off, which was aggravated by the development of a grid of dirt roads that abutted its waters. At the Higgins Lake Foundation, Buhl, along with other volunteer trustee members, raised funds to develop and implement a watershed plan to prevent erosion.

"These types of problems are not exclusive to the Chesapeake Bay region," Buhl said. "My experiences have given me the skills to effectively address such matters."

Buhl received her Bachelor of Arts Degree in American Government from the University of Virginia in 1977 and her Juris Doctor from Wake Forest University in 1981. She intends to relocate to Annapolis with her husband, Howard.
