Governor reforms brownfields initiative

By Jeffrey R. Welsh

Governor Robert L. Ehrlich, Jr. announced major reforms to the state's brownfield cleanup program Nov. 21, making it easier for developers to join the volunteer cleanup and redevelopment of the contaminated industrial sites. Governor Ehrlich also announced that a coordinator will be hired to market the program, work with local governments and developers and market sites with strong development potential.

"Cleaning up brownfield properties and putting them back into productive use has been a priority of my administration from day one," the governor said. "Today we are announcing

Governor Robert L. Ehrlich Jr. announces changes to a program designed to clean up and redevelop abandoned property.

across-the-board changes in the way we run and market the voluntary cleanup program."

Brownfields are properties contaminated, or thought to be contaminated, with industrial wastes or other pollutants. Once cleaned, they are ideal sites for development because they are near existing infrastructure and population centers.

"In addition to cleaning up contamination," Governor Ehrlich said, "a successful

brownfields program leads to more jobs, increased tax revenues and revitalized communities."

Governor Ehrlich said the decision to create the redevelopment coordinator position is the key to his brownfield initiative. "Maryland's old program was too often reactive," he said. "As a result, customer service suffered and there was a lack of certainty about the process and

Businesses receive note for environmental efforts

By Laura Armstrong

Businesses for the Bay, a voluntary program promoting pollution prevention at facilities throughout the Chesapeake Bay watershed, held its annual meeting at the Patuxent Wildlife Refuge in Laurel, Maryland on Oct. 1 to recognize the outstanding environmental accomplishments of area organizations.

Businesses for the Bay continues to expand its membership and post greater pollution prevention results each year. With over 500 members (140 from Maryland), the program is well on its way to meeting a goal of 1,000 members by 2005. Par-

ticipants have reported reducing and recycling more than 6.4 billion pounds of waste at a cost savings of over \$313 million since the program's inception in 1996.

MDE Acting Secretary Kendl Philbrick presented awards to the following *Businesses for the Bay* members for their pollution prevention successes in 2002:

Atotech USA, Inc., Baltimore, MD, Outstanding Achievement Award for a Small Facility

NTN-BCA Corporation, Lancaster, PA, Outstanding

A Tale of Two Summers

Area breathed easier this summer than last

By Bob Maddox

Building sandcastles on the beach, splashing in the pool, and picking tomatoes from the garden – all familiar summertime activities. Activities suited for warm, sunny weather. But earlier this summer, many folks wondered if there would be a good day for the beach or whether any tomatoes would grow. There just wasn't much sun peeking through the clouds. In fact, it rained most days from May through mid-June. Quite a contrast from the spring and summer of 2002.

By the beginning of summer 2002, Maryland, as most states on the East Coast, was in the midst of an extreme drought. In August, groundwater and wells were at record low levels and water-use restrictions were in effect in most of the state. The lack of rain led to a higher number of wildfires, dead vegetation, poor crop production and poor air quality. The weather conditions were just right for the formation of ground level ozone, an air pollutant that is harmful to human health and the environment.

Ground level ozone is a secondary air pollutant that forms when primary pollutants react to strong sunlight. Primary pollutants are emitted from industrial sources, mobile sources and other human activities such as lawn maintenance. The clear skies last year allowed the intense sunlight to cook those chemical compounds in the atmosphere to form ozone. The absence of rain allowed pollutants to remain suspended for long periods. In 2002, the Baltimore area experienced 16 Code Red bad air days when ozone reached unhealthy levels and

exceeded the federal one-hour ozone standard. The Washington, D.C. metro area had nine Code Red days. These numbers were significantly higher than the seasonal averages of 11 for Baltimore and six for Washington, D.C.

In comparison, during this past summer, Maryland saw higher than normal rainfall, overcast cloudy skies, and generally good to moderate air quality. Through the first week of August, Maryland experienced two Code Red bad air days that occurred on June 25 and 26, coinciding with a period of dry, sunny and hot weather.

The contrast in the weather of the past two summers shows how weather plays an important role in air quality. Although we cannot control the weather, we can control what we release into the air. When weather conditions are in place to cause ozone formation, the Maryland Department of the Environment (MDE) advises the public to take voluntary actions to reduce emissions of air pollutants. Some of these actions are as easy as not using a gasoline-powered lawn mower. Other actions may involve planning ahead such as getting up earlier to use public transit for the morning commute.

To learn more about air quality forecasting, current ground level ozone conditions and voluntary actions, visit MDE's Web site at www.mde.state.md and the

Agency chief, students test streams

Students and teachers recently joined Maryland Department of the Environment (MDE) Acting Secretary Kendl P. Philbrick to test local waterways. On Nov. 4 the acting secretary visited Oakdale Elementary School in Ijamsville and on Oct. 14 sampled the waters near Linton Springs Elementary in Sykesville, seen above. The effort is part of MDE's continuous environmental education and stewardship initiative and also helped mark World Water Monitoring Day in the state. MDE recently provided 10 schools across the state with simple water quality monitoring kits containing 50 sets of tests that students can use to gather

MDENVIRONMENT PHOTOS BY DON MAULDIN

data on four important measures of water quality – dissolved oxygen, pH, temperature, and clarity. By participating, Maryland students receive a hands-on experience in assessing the condition of their local environment – especially in light of impact of Hurricane Isabel. Students will also be using some of the same basic tests that MDE uses to develop objective information needed for the assessment, protection, and restoration of Maryland waters.

Air-Watch Web site at www.air-watch.net. When viewing the Air-Watch site, users can register on the E-Alert

system to receive notification via e-mail or facsimile when ozone reaches unhealthy concentrations.

Tire hauler pleads guilty, spends time in jail

Attorney General J. Joseph Curran, Jr. recently announced that Kenneth Eugene Snowden, 47, of the 10000 block of

Woodlawn Boulevard in Upper Marlboro, pled guilty before Judge John F. Slade, III in St. Mary's County District Court, to

illegally hauling scrap tires without a hauler's license. Snowden was sentenced to two years of

Artists rethink recycling

By Kelley Schaefer

Objects made of recycled and used materials, that would have otherwise gone in the trash, were all on display in a different way at the Maryland Department of the Environment's (MDE) 2nd Annual "Rethink Recycling" sculpture contest held Nov. 13 to celebrate America Recycles Day (ARD). ARD is a national event that promotes recycling, source reduction, reuse, and the purchase of recycled content products.

Students, teachers, parents, county and state government officials, corporate businesses, media representatives, museum and national organizations gathered together to observe hand crafted animals, robots, water fountains, wedding dresses, and more fashioned from discarded waste materials.

Thirty-nine high school students from schools across Maryland created the sculptures for exhibition and judging. Sculptures were judged on creativity, use of recycled materials, workmanship, and popularity. The sculpture contest challenged students to innovatively and artistically use recycled materials as a solution to waste reduction. This event generated a tremendous amount of enthusiasm from the students, their parents and teachers.

Judges Harold Fisher, morning show anchor at WBFF's Fox 45 in Baltimore; Steve Kullen, America Recycles Day National Program Manager; and Ana Hayes-Perez, Baltimore Public Works Museum Curator, had the task of determining the winners in the contest. The sculptures consisted of everything from CDs, cardboard, car parts, plastic bottles, horseshoes and a TV. Private sponsors (American Plastics Council, Browning

Ferris Industries Waste Services, Constellation Energy, Maryland Soft Drink Association, National Association for PET Container Resources, Sharp, and Staples) provided the prizes, refreshments, and decorations.

The top sculptor was Ashley Taylor, a student from St. Mary's County's Leonardtown High School. Her winning sculpture was a fish made from cardboard, aluminum cans and bottle caps. Taylor received \$500 for her winning sculpture. Microwave ovens were awarded to: Michelle Paul, Baltimore County's Carver Center for Arts and Technology for Best Workmanship; Eric Mack and Kwesi Stephenson-Cox, Prince George's County's Suitland High School for Most Creativity; and Danielle Ponton, Charles County's LaPlata High School for Best Use of Materials. A \$50 Staples store credit was awarded to Natalie Stephens, Carroll County's South Carroll High School for her sculpture that was Most Popular. These and other sculptures are on display at MDE's headquarters in Baltimore through Dec. 19.

MDE encourages the recycling of all materials because of the environmental and economic benefits that recycling provides. The "Rethink Recycling" sculpture contest is just one of the avenues MDE uses to educate and empower students and the general public to reuse and recycle materials that would have otherwise gone to the landfill.

To find out what you can do to reduce, reuse, recycle and buy recycled products, visit MDE's recycling web page at: www.mde.state.md.us/recycling.

The conference's keynote

speaker, Paul Hawken, author of *Natural Capitalism: Creating the Next Industrial Revolution*, inspired meeting participants to apply the principles of natural capitalism to their businesses. Natural capital refers to the natural resources and ecosystem services that make economic activity possible. Current business practices typically fail to take into account the value of these assets, and as a result, natural capital is being degraded.

MDE congratulates all the award winners and encourages organizations in Maryland, including non-profit groups, government facilities, schools, and businesses of all types to join this team of forward-looking organizations are committed to implementing pollution prevention. It's free and easy to join.

Simply visit www.b4bay.org or call the Chesapeake Bay Program at 1-800-968-7229, ext. 719, or MDE at 1-800-633-6101, ext. 4119 to learn more.

REFORM

Continued from Page 1

the amount of time required to get approval. Today's announcement solves those problems."

Key reforms of the brownfield program include:

- The Voluntary Cleanup Program (VCP) application has been overhauled, cut from 22 pages to eight pages, with a simple checklist that will help developers submit an application that meets agency requirements.

- A comprehensive guide has been developed to provide step-by-step instructions, sample applications and FAQs.

- The VCP will have its own

web site, hosted by Department of the Environment servers, found at: www.mde.state.md.us/brownfields and distinctive design.

- A marketing plan is being developed to promote the VCP.

- MDE will continue to provide workshops and training for consultants, bankers, developers and local governments.

- A geographic information system (GIS) mapping function on the web site, along with Internet access to public records of sites, will greatly expand the quantity and quality of information that is available.

Kendl P. Philbrick, Acting

Secretary of the Environment, said the initial response from stakeholders has been very positive. "When we began working on these reforms, we had input from local governments, developers, consultants, lenders and environmentalists, and we listened very closely," Philbrick said. "This is a very customer-friendly program today, and one that will benefit Maryland's environment and economy."

He said that program staff have been trained to be more responsive to applicants, which will improve overall review of cleanup plans.

"When there is a problem,"

Philbrick said, "we are going to pick up the phone or send an e-mail. We understand that time is important to development decisions, and we're going to operate in real time with this program."

The Voluntary Cleanup Program was enacted in 1997. VCP provides a release of liability and "certainty" regarding environmental requirements. It provides timelines for MDE reviews and determinations. Companion legislation created the Brownfields Revitalization Incentive Program under the Department of Business and Economic Development.

Enforcement & Compliance Notes

--Sept. 15 to Oct. 15, 2003--

Air & Radiation Management Administration

Signode – Baltimore County
On September 24th, MDE signed a Consent Order with Signode to settle an enforcement action. Signode, a metal strapping manufacturer, violated federal air quality standards for Volatile Organic Compound (VOC) based coatings by not performing monthly calculations needed to demonstrate compliance. In the Consent Order, Signode agreed to pay a \$10,000 penalty to settle the case. Signode also agreed to conduct the monthly calculations as required and has returned to compliance. **Status:** Signode has 30 days to pay the Penalty (Reference #AQCP 030924)

Homestead Mobile Estates – Cecil County

On September 24th, Homestead Mobile paid a \$4,500 assessed penalty to settle an open burning case. Homestead operates a mobile home park near Port Deposit. The facility violated air quality regulations on two occasions by conducting open burning without obtaining an open burning permit and by burning materials that create dense smoke when burned. **Status:** Case Closed. (Reference #AQCP 0240A)

Unilever – Baltimore City
On September 25th, MDE re-

ceived payment of an \$8,600 penalty from Unilever to settle violations resulting from failure to perform visible emission (VE) observations on various processes at its bar soap and liquid detergent manufacturing plant. To settle the case, the company signed a Consent Order with MDE. The settlement also includes a Supplemental Environmental Project valued at \$12,900 for the purchase of medical equipment for the University of Maryland Medical System Foundation's Breathmobile program. Unilever has returned to compliance. **Status:** Case Closed (Reference #AQCP 030627)

S. Dev Aujla MD – Baltimore County

On September 30th, MDE signed a Consent Order with Dr. Aujla to resolve violations of radiation control regulations. The violations include failure to certify a radiation machine facility, as well as violations of various other operational and record keeping requirements. The Consent Order includes a penalty due MDE in the amount of \$8,000. **Status:** Dr. Aujla to pay the Penalty in 16 monthly installments. (Reference #RHP 03-01)

Waste Management Administration

William Mathews - 31 affected properties – Baltimore County – William Mathews was

issued a Complaint, Order and a combined Civil Penalty equaling \$40,000 on September 12 for violating Maryland's Lead Laws by failing to register pre-1950 rental units and failing to obtain risk reduction certificates of lead inspection compliance. **Status:** William Mathews has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the Penalty. (Reference No.02-03-5481)

Heather L. Quinn - 1 affected property – Anne Arundel County - Heather L. Quinn was issued a Complaint, Order and Civil Penalty equaling \$7,500 on September 29 for violating Maryland's Lead Laws by failing to register a pre-1950 rental property and failing to obtain risk reduction certificate(s) of lead inspection compliance. **Status:** Heather L. Quinn has 10 days to request a hearing on the Complaint and Order and 30 days to request a hearing on the Penalty. (Reference No.2003-02-6140)

Joseph Abrefah - 3 affected properties – Baltimore City - Joseph Abrefah was issued a Complaint, Order and Civil Penalty equaling \$20,000 on October 16 for violating Maryland's Lead Laws by failing to register pre-1950 rental properties and failing to obtain risk reduction certificates of lead inspection compliance. **Status:** Joseph Abrefah has 10 days to request a hearing on the Complaint and Order and 30 days to request a

hearing on the Penalty. (Reference No.03-30-6838)

Water Management Administration

The Board of County Commissioners, Allegany County – On October 16, 2003, MDE and the Allegany County Commissioners finalized an administrative consent agreement regarding improvements to the Celanese Wastewater Treatment Plant. Under the terms of the consent agreement, Allegany County has agreed to submit within 30 days a plan to MDE for review and approval for upgrade of the plant to provide biological nutrient removal (BNR). The consent agreement will provide an enforceable schedule for completion of plant improvements and establishes stipulated penalties for violations of interim effluent standards for certain NPDES permit effluent limitations during construction of BNR upgrades. **Status:** Case closed. (Reference # CO-04-0042).

Kent County Commissioners, Kent County – On October 13, 2003, MDE and the Kent County Commissioners finalized an administrative consent order regarding improvements to the Kennedyville Wastewater Treatment Plant. Under the terms of the consent order, Kent County has agreed to remediate the Kennedyville Wastewater

See NOTES, Page 7

ISABEL Continued from Page 1

of Homeland Security's Federal Emergency Management Agency (FEMA), the money represents more than \$20.5 million in housing assistance, \$7.5 million in assistance for other needs such as personal property, transportation and medical expenses, \$44.2 million in low interest loans from the U.S. Small Business Administration (SBA) and more than \$9.6 million in funds to rebuild infrastructure.

As part of the recovery effort, in early November state officials implemented a coordinated plan to remove soil contaminated by heating oil from the exterior of homes along the coastal areas of the Chesapeake Bay at no cost to homeowners.

In an unprecedented move, FEMA agreed to provide funding for 75 percent of the eligible costs to the State of Maryland for cleaning up homeowner's yards contaminated with home heating oil spilled during the storm surge. Maryland state government is paying for the remaining costs.

Oil that spilled on the ground has the potential to contaminate ground water and pose health risks to residents that rely on

well water for drinking.

"The cooperation of FEMA, state and local government was absolutely essential in addressing this difficult public health and environmental issue," said Maryland Department of Planning Secretary Audrey E. Scott who is coordinating the state's response to Hurricane Isabel.

MDE has taken the lead in the effort and has identified almost 500 contaminated properties. "It is important homeowners know that this action is necessary to protect their health, waters of the state and assist in getting their lives back to normal," said MDE Acting Secretary Kendl P. Philbrick.

The Maryland Department of General Services (DGS) is contracting commercial firms to obtain soil samples from properties. The purpose of the soil samples is to determine the extent of contamination and the amount of soil that must be removed.

DGS is using contractors to conduct the removal of the soil and replace it with clean fill, then restore the sites with topsoil, grass seed and straw mulch.

As of press time, more than 225

PHOTO COURTESY GOV.'S PRESS OFF.

Governor Robert L. Ehrlich Jr. speaks with a North Beach resident while assessing damage in the Calvert County community. The town's boardwalk, completed in recent years, was decimated and many homes were condemned.

property owners had signed access agreements and field testing was concluded at 126 sites. Eighty-three of those sites need remediation. Soil removal was completed at 33 locations.

Remediation operations began in Anne Arundel and Baltimore counties, two of the jurisdictions with the heaviest impact from the Hurricane Isabel storm surge. The following is a summary of the Isabel recovery activity and statistics:

- \$20,511,816 was disbursed to residents to assist with temporary housing and home repairs; 11,378

property inspections were completed.

- More than 8,600 people visited FEMA/MEMA/Local Disaster Recovery Centers. The average payout from FEMA is about \$3,000. Most of the federal assistance is in the form of low-interest loans.

NOTES

Continued from Page 6

Treatment Plant lagoon by no later than January 1, 2004 to prevent leakage of wastewater to groundwaters of the state. The consent order establishes interim performance standards for certain permit parameters during the remediation project and stipulated penalties for violations of consent order milestones. **Status:** Case closed. (Reference #CO-04-0018).

Water and Sediment Pollution Penalties – Statewide

During the period September 15, 2003 to October 15, 2003, MDE collected an additional \$4,600 to the Clean Water Fund in resolution of alleged water pollution violations from five facilities and \$11,120 to the Sediment Fund in resolution of alleged erosion and sediment control/sediment pollution violations from four facilities.

TIRES Continued from Page 3

probation and fined \$2,500. In suspending the fine, Judge Slade noted that Snowden had spent 47 days in jail awaiting trial after failing to appear for his scheduled trial in August. The maximum criminal penalty for hauling scrap tires without a license is a \$10,000 fine.

Snowden was arrested in a stolen truck filled with tires in Washington, D.C. on December 5, 2002, after authorities learned that he had hauled scrap tires from a Mechanicsville tire store a day earlier. Investigators with the District of Columbia Metropolitan Police Department's Environmental Crimes Unit and the Attorney General's Environ-

mental Crimes Unit were able to trace the tires back to several locations in St. Mary's and Prince George's counties. Snowden had his scrap tire hauler's license revoked by the Maryland Department of the Environment in 1999. Criminal charges in Prince George's County and the District of Columbia are still pending.

"The illegal disposal of scrap tires is not only a public health threat, but a blight on communities around our state," Attorney General Curran said. "It is the responsibility of tire store owners to use only licensed haulers to block the flow of illegally dumped tires."

Maryland requires tire dealers to use licensed scrap tire haulers to help prevent illegal tire dumping. Last year, the Maryland Department of the Environment spent over \$2.6 million to clean-up illegal scrap tire dumps. Individual property owners are also victimized with untold additional clean-up costs each year.

This conviction follows a joint investigation conducted by the Environmental Crimes Units of the Office of the Attorney General and the District of Columbia Metropolitan Police Department, the Maryland State Police with the assistance of the Maryland Department of the Environment's Scrap Tire Program.

For the Record

The following is a partial list by county of applications received by MDE and other permitting activity between August 16 and September 15, 2003. For more information on these permits, please contact MDE's Environmental Permit Service Center at (410) 537-3772.
