

**MARYLAND DEPARTMENT OF THE ENVIRONMENT
RADIOLOGICAL HEALTH PROGRAM**

**INSTRUCTIONS FOR COMPLETION OF
GENERAL LICENSE DEVICE REGISTRATION FORM**

The **General License Device Registration** form is self-explanatory. On the top half of the form, enter all requested information about your firm, contact person and telephone number, and exact location at which your general license device(s) are stored, as well as the location(s) at which these devices are used.

Note that one registration covers one physical storage location. If general licenses are stored at more than one location, more than one registration is required.

On the bottom half of the form, list each general license device in your possession. Information required is manufacturer (or initial transferor) of the device, model number, serial number, radioisotope, and activity in mCi. If you possess more than 16 devices, use an additional sheet.
