Facility/End User

# Confirmation of Suitability (CoS) for IR/BU Material Reuse

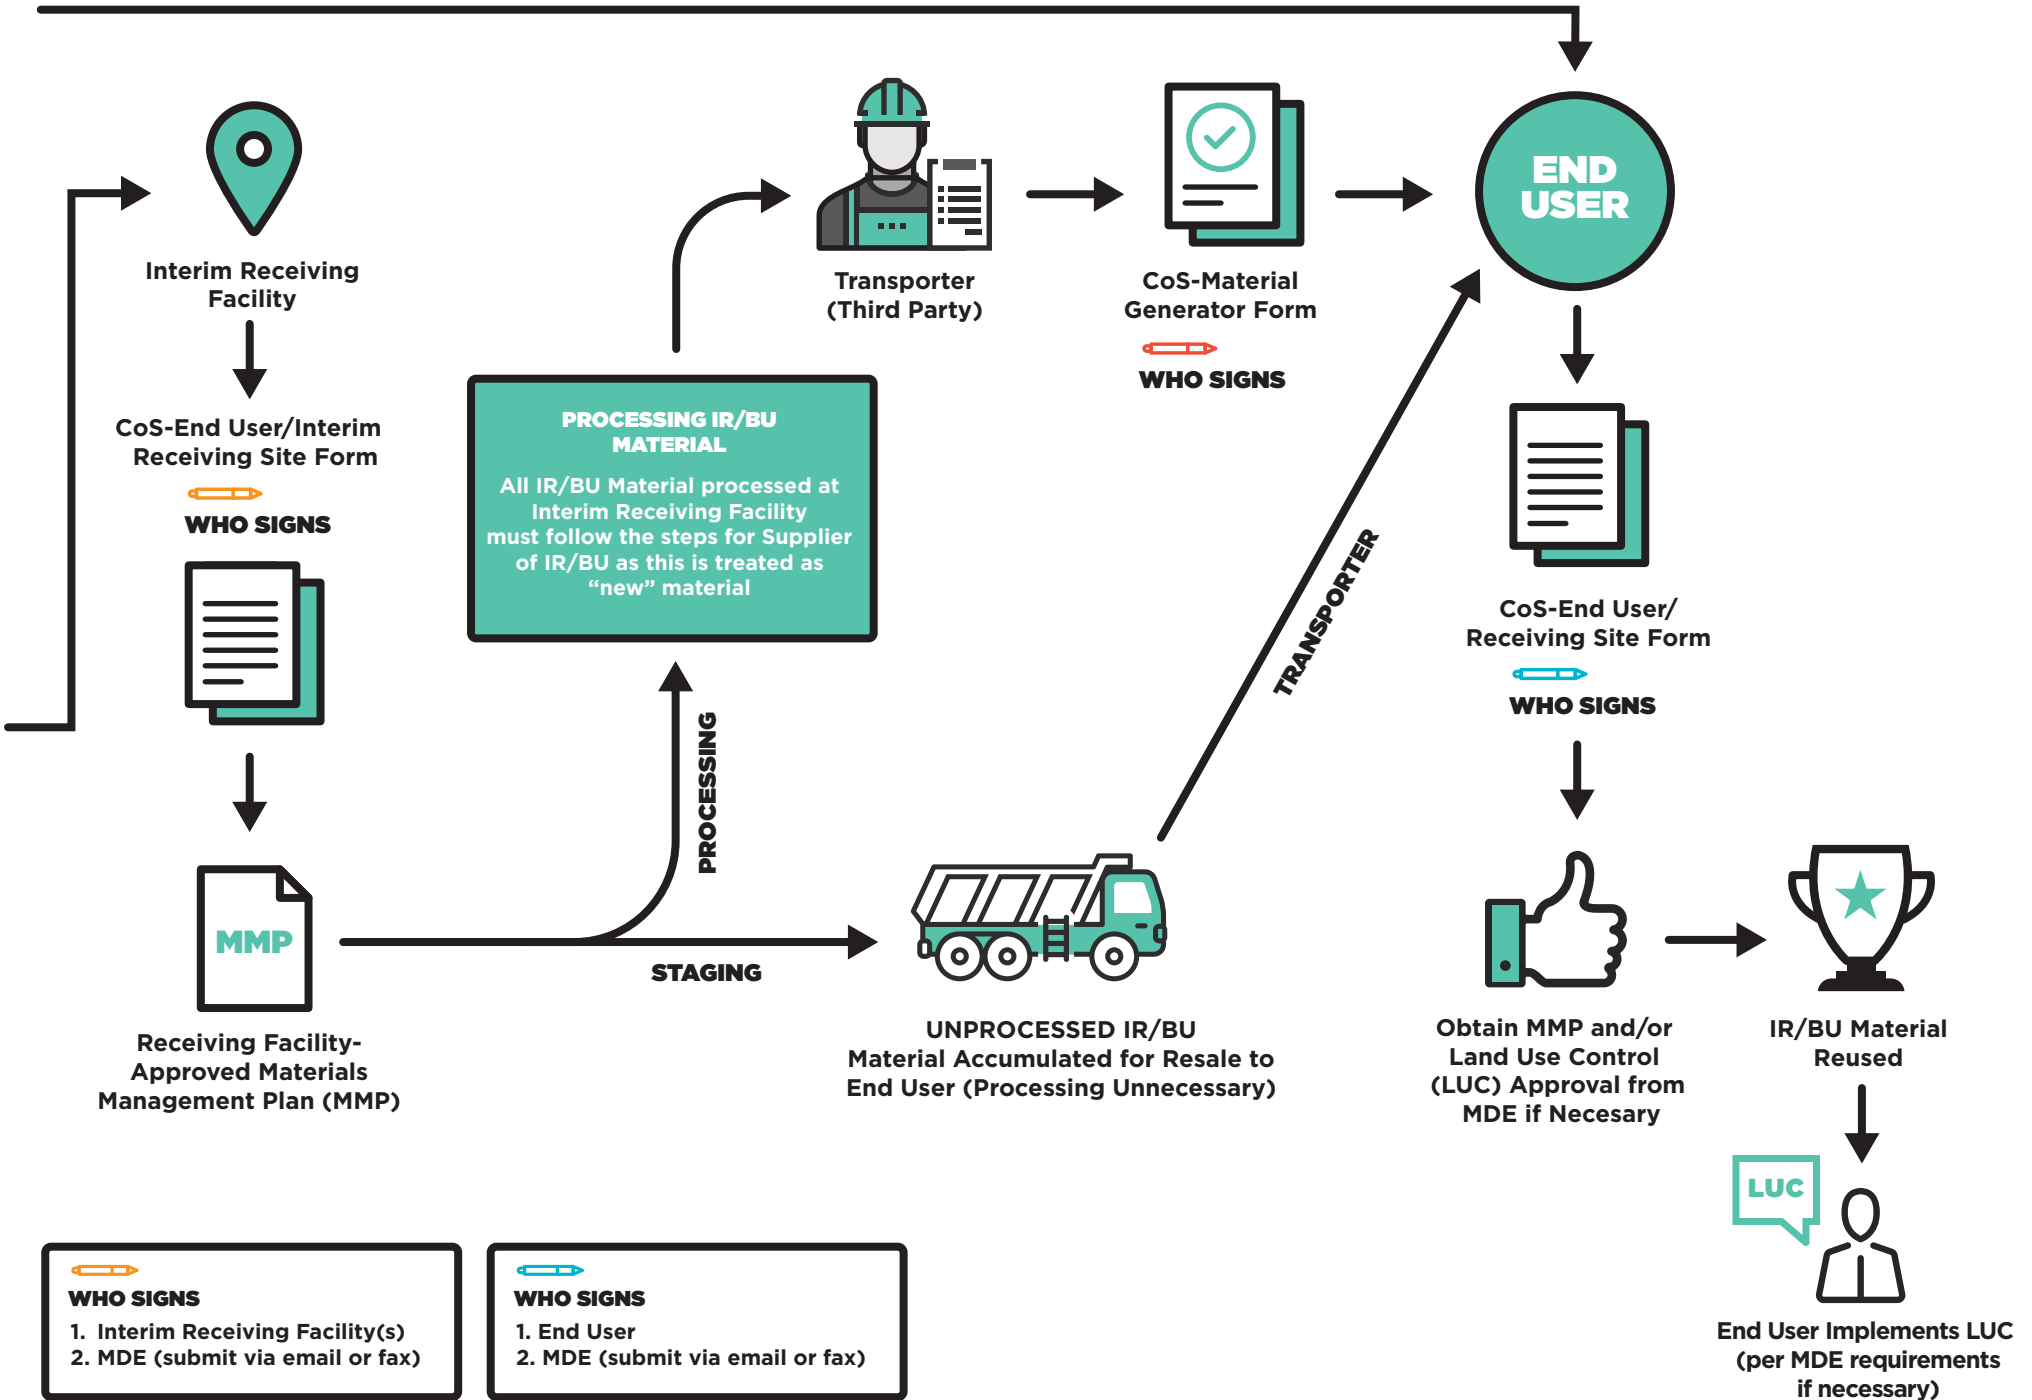

**WHO SIGNS**

1. IR/BU Material Supplier
2. MDE (Submitting Email or Fax)

# INTERIM RECEIVING FACILITY

# END USER

## DEFINITIONS

**Materials Management Plans:** a detailed plan noting how the material will be staged, processed/amended and sampled (if needed), include documentation for all applicable permits.

---

**Land Use Controls:** Any restriction or control that serves to protect human health and the environment by limiting use of or exposure to any portion of the property, including water resources.

---

**Processed Material:** Dredged material or fill that requires some degree of drying or other processing, amending, or blending to make it suitable for innovative reuse and beneficial use.

---

**Unprocessed Material:** Fill material that can be used directly from a site without any processing or alteration as long as it meets applicable testing and criteria for a particular end use.
