

BIOCHEM MANAGEMENT Baltimore, Maryland

Site Location

The Biochem Management site is located at 1917 Benhill Avenue, Baltimore, Maryland. Curtis Bay is about 1,000 feet from the site.

Site History

The Biochem Management site was used until 1983 as an infectious waste incineration facility. All of the operations were conducted on the cement floor in the warehouse. The wastes before and after incineration were kept indoors temporarily.

Current Status

On July 1, 1984, the Department of Health and Mental Hygiene's (DHMH) Waste Management Administration published a Master List of all sites where the Department had reason to believe or had been notified that Controlled Hazardous Substances may be present. Subsequent to the publication of this list, the Department conducted further investigation of Department files and on-site investigations at a number of these sites and published a status update in the Maryland Register on January 4, 1985. Based on this review, it was determined by the Administration that No Further Action at this site would be necessary and the site was deleted from the State Master List. Since the site was also listed on the U.S. Environmental Protection Agency's (EPA) Comprehensive Environmental Response, Compensation and Liability Information System, a designation of No Further Remedial Action Planned by EPA would constitute a final decision by both the State and EPA based on the information that was available at the time.
