| No. | BASIN | COUNTY | Facility Name | Status | ENR Funded - Highest Flow in Permit (MGD) | Funded TN Cap (Lbs/yr) | Funded TP Cap (Lbs/yr) |
|-----|-------|--------|---------------|--------|---|---------------------------|---------------------------|
| | | | | | | 135,884 | 10,345 |

Notes:

Currently, there is no individual cap for minor plants. They are counted as one aggregate load at each basin.

Grant recipients must agree with the above caps, which are based on

TN Cap = the least load from 4 mg/l TN at highest permitted capacity, current policy, or 6,090 lbs/year.

TP Cap = the least load from 0.3 mg/l TP at highest permitted capacity, current policy, or 457 lbs/year.
