

**Baltimore County– Fiscal Year 2020
Financial Assurance Plan
and
Watershed Protection and Restoration Program Annual Report
as required under the
Watershed Protection and Restoration Program
December 23, 2020**

Executive Summary

The submission of Baltimore County’s Financial Assurance Plan (FAP) and Watershed Protection and Restoration Program (WPRP) annual report to the Maryland Department of the Environment (MDE) fulfills requirements specified in the Maryland Article – Environment, Section 4-202.1. These plans and reports are being filed to MDE in order to document all actions implemented by Baltimore County to comply with its National Pollutant Discharge Elimination System (NPDES) municipal separate storm sewer system (MS4) permit and demonstrate the County’s ability to pay for these activities through the Watershed Protection and Restoration Fund.

An MS4 permit was issued to Baltimore County on December 23, 2013 and Baltimore County has submitted annual reports to MDE by December 23 in the years 2014, 2015, 2016, 2017, 2018, 2019, and 2020. These annual reports are based on the State’s fiscal year (FY) and include updates on the County’s MS4 programs and impervious surface area restoration. Monitoring results are based on calendar year. Baltimore County has continued implementing its MS4 program and this Executive Summary documents achievements detailed in its 2020 annual report.

In compliance with the Maryland Article Section 4-202.1, the following FAP and WPRP annual report includes all activities that have been completed in compliance with Baltimore County’s MS4 permit, and five-year projections for the implementation of its stormwater program and best management practices (BMPs) necessary for meeting permit requirements. Specifically, these plans and reports document complete implementation and financial data for FY14 – FY20.

A major tenet of the FAP and WPRP annual report is to demonstrate the financial wherewithal for meeting MS4 permit impervious surface area restoration requirements. In order to document this ability, Baltimore County is providing MS4 program implementation projections for FY21, FY22, FY23, FY24, and FY25. The next FAP will be submitted in two years on the anniversary date of the County’s MS4 permit issuance. The next WPRP annual report will be submitted next year on the anniversary date of the County’s permit. The sections in this Executive Summary follow the order of Baltimore County’s MS4 permit found in Part IV, Standard Permit Conditions, and highlight the major achievements for each program element. The Baltimore County Annual MS4 Report can be found at: <http://www.baltimorecountymd.gov/Agencies/environment/npdes/> for more detailed information.

A. Permit Administration

The County has designated an NPDES Management Committee, composed of representatives from agencies involved in NPDES activities, that meets on a periodic basis for updates and coordination. There were no major organizational changes over the last year.

B. Legal Authority

The County continues to maintain adequate legal authority in all areas related to implementation of its NPDES permit. There were no regulatory changes over the last year.

C. Source Identification

The 2020 annual report is the second such report where the County is utilizing the MDE MS4 geodatabase format for all annual data reporting requirements. No major changes were made in FY 2020.

D. Management Programs

1. Stormwater Management

As of July 1, 2020, there are 4,159 built facilities. 32,763 acres of land are treated by one or more of these facilities. The County completed 1,807 stormwater facility inspections during FY20, which is 420 more than the 1,387 minimum required by COMAR 26.17.02.11.

2. Erosion and Sediment Control

In FY20 there was a decrease in number of grading permits issued (150) and acres disturbed (617) compared to FY19 (207 permits and 1,138 acres), and a decrease in in new building permits (1,306, down from 1,732). A total of 4,128 sediment control inspections were conducted with 642 enforcement actions (566 correction notices and 76 stop work orders). The County's delegated authority for the erosion and sediment control program is valid through June 30, 2020. Baltimore County has recently received the application paperwork to apply for new delegation and is currently processing the application.

3. IDDE

The County screened 161 storm drain outfalls in calendar year 2019. Of the outfalls that were screened 99 were found to be above water quality thresholds. The County investigated 250 complaints. Of the 250 complaint investigations 217 were closed and 33 are still under investigation.

The County also conducts hotspot surveys of commercial/industrial sites. A total of 120 sites were surveyed during FY 2020. Of the 120 sites, 16% (19 sites) were confirmed hotspots. Follow-up investigations of these hotspots has resulted in 10 of the cases being closed.

The County continues to implement a proactive IDDE program. Additionally, pollution reductions from individual illicit discharge eliminations are available within the Chesapeake Bay Model. The County has implemented a system for tracking and reporting these pollution reductions, and is using the IDDE program to make progress on TMDL waste load allocations and the MS4 impervious surface restoration requirement.

4. *Trash and Litter*

The County has continued litter reduction efforts including instream monitoring and litter removal programs. Baltimore County continued to implement the trash and litter reduction strategy and the trash TMDL implementation plan.

The County is in a multi-year contract for education and outreach services. During FY 2020, anti-litter signs for trash cans were designed and manufactured, and sign installation began. Installation of signs on all 680 trash cans maintained by DPW should be completed by the end of FY2021. The County formed and started collecting data for an ongoing upland visual study to measure the effectiveness of anti-litter efforts that will be implemented in FY2021.

The County entered an agreement with the Waterfront Partnership of Baltimore to provide funding for the operation of the Gwynns Falls Trash Wheel. Based on the load removed by Mr. Trash Wheel in the Jones Falls, the County anticipates this reduction will help us achieve the remaining WLA for the Trash TMDL in the Gwynns Falls.

5. *Property Management and Maintenance*

The County's industrial sites are in compliance with the General Stormwater Discharge Permit for Industrial Activity (12-SW-A). There were a total of 35 permits in effect in FY20, however several facilities received approval to terminate coverage and will no longer be subject to the requirements of the permit. Stormwater Pollution Prevention Plans (SWPPP) are being maintained for the county's industrial sites, staff are trained, and sites are inspected via Quarterly Visual Monitoring and Routine Facility Inspections.

Chemical application of fertilizer, pesticide/herbicide, and deicer is reported for all county property ; efforts are being made to reduce the amount of chemicals applied.

During FY 2020 the County removed 1,289 tons of debris through the street sweeping program and 46 tons of debris through the storm drain cleaning program.

6. *Public Education*

The County has continued to enhance and expand its education and outreach efforts across multiple media. Baltimore County has recorded a significant increase in direct personal engagement over the past years, due largely to greater engagement of the County's on-call outreach contract. While this contract continues to be leaned on, complications from COVID-19 resulted in slight reductions in face-to-face engagements. Continued focus on enhancing social media reach, chiefly through the "Clean Green Baltimore County" Facebook page, have also been recorded. This reach has been aided by the incorporation of short interpretive videos highlighting the water quality-related work of County departments.

E. Restoration Plans and Total Maximum Daily Loads

1. *Watershed Assessments*

Detailed watershed assessments for the entire jurisdiction, as required by the County's NPDES MS4 permit, were complete by December 2018. Most of these assessments occurred under the County's Small Watershed Action Plan (SWAP) program which split

the County's watersheds into 23 planning areas. Within this reporting period Baltimore County continued the process of securing the services of an on-call watershed planning contract to assist with revisions and updates to the existing plans to better align them with anticipated updates to the Chesapeake Bay watershed model and new MS4 permit requirements.

2. *Restoration Plans*

- a) Baltimore County succeeded in completing the challenging NPDES MS4 permit 20% impervious surface restoration requirement prior to the December 23, 2018 deadline, as acknowledged in a November 2019 letter from MDE. The total impervious restoration counted towards the permit requirement is 6,081.5 acres, or 20.1% of the untreated impervious surface baseline.

Impervious accounting guidance for the next MS4 permit remains in draft form. Applying the draft guidance released by MDE in December 2019, the County completed 923.1 acres of impervious surface restoration during FY2020. Adding the 303.7 acres completed during FY2019 and after the prior permit expiration date, the County has completed 1,226.7 acres of impervious surface restoration via perennial BMPs. This total will apply towards the County's next MS4 permit requirements.

- b) At the time of this report's submittal to MDE, implementation plans for stormwater WLA approved by EPA have been submitted as required by the County's NPDES MS4 permit. Review of implementation plans for phosphorus and sediment in Liberty Reservoir watershed are being conducted to address certain comments from MDE on those plans. Per discussion with MDE on 10/22/2020 revisions to address outstanding comments will be completed along with updates to other implementation plans throughout the County with respect to the new MS4 permit and relevant MDE guidance that is forthcoming.

3. *Public Participation*

Baltimore County publishes all draft restoration plans on the County webpage for public review and comment, and places notices in local newspapers regarding access and opportunities for comment. The public comment periods for these watershed assessments and restoration plans are at least 30 days, and a comment response document is produced and attached to each plan to publically acknowledge and address received comments. Baltimore County is currently assessing other methods of driving public participation in its watershed assessment and restoration processes.

4. *TMDL Compliance*

Baltimore County continues to calculate its progress toward meeting applicable WLAs included in EPA approved TMDLs through its reporting chiefly in Sections 6, 9, and 10 of this annual report. Our watershed monitoring program assists with tracking progress toward biological, bacterial, and chemical endpoints, while tracking the credited pollutant load reductions provides documentation on progress toward meeting assigned WLAs and assists with long range planning for implementation to better reach water quality endpoints of many types.

Progress toward addressing phosphorus WLAs has been notable: 2 out of 5 watersheds have attained the WLA, 2 are on target, and 1 is behind schedule (Liberty Reservoir).

Nitrogen WLAs have been more of a challenge: Back River is on target, but Baltimore Harbor is behind schedule. Sediment WLAs have seen many positive gains: 4 of 7 have attained the WLA, 2 are on target, and 1 is behind schedule (Liberty Reservoir). Progress on the trash WLA is behind schedule (Baltimore Harbor). Implementation targets are based on deadlines set within each TMDL implementation plan. For most nutrient and sediment WLAs the self-imposed deadline has been 2025 (with the exception of Liberty Reservoir being 2030), while other WLAs (i.e. PCBs, bacteria, trash, etc., which have different methods of crediting implementation progress) have been given a 2035 deadline.

F. Discharge Characterization/Assessment of Controls

In calendar year 2019, Baltimore County met the requirements for the watershed restoration and stormwater management assessment utilizing the Scotts Level Branch biological and physical habitat monitoring. In addition, the County has continued the following programs to assess the conditions of Baltimore County waters and locate areas in need of restoration, which aid the progress in meeting TMDL reduction targets:

- Bacteria monitoring program
 - 34 fixed sites countywide were monitored each month for the bacteria trend monitoring program generating 442 samples in CY2019
- Trash monitoring program
 - 24 fixed sites were monitored for trash accumulation in the Gwynns Falls and Jones Falls watershed
- Chemical monitoring program
 - 41 fixed sites countywide were monitored each month for the chemical trend monitoring program generating 478 samples in CY2019
 - 16 Scotts Level Branch storm events were collected with 8 storm events at the instream monitoring location and 8 storm events at the outfall location. 11 rounds of baseflow monitoring were collected for a total of 110 samples.
- Biological monitoring programs
 - 50 randomly selected sites were sampled for the stream random point program
 - 44 randomly selected sites were sampled for the sediment TMDL biological monitoring program
 - 25 randomly selected sites were sampled for the tidal water random point program
 - 6 fixed sites were monitored for the reference site monitoring program
 - 11 fixed sites were monitored for the sentinel site monitoring program
- Geomorphological monitoring program
 - 17 fixed cross sections were measured in the Scotts Level watershed
- Restoration effectiveness monitoring program
 - 10 fixed biological monitoring sites were monitored in the Scotts Level watershed
 - 3 fixed biological monitoring sites were monitored in the Minebank Run/Jennifer Branch watersheds
- Special studies monitoring program
 - 7 tidal segments were monitored for the Submerged Aquatic Vegetation Monitoring Program

G. Program Funding

The EPS funding for capital and operating budgets for FY2020 are \$12,533,075 and \$6,426,634, respectively. The County's total expenditures on impervious surface restoration during FY2020 were \$21,388,750.

Baltimore County's third biennial Financial Assurance Plan is submitted with this NPDES MS4 annual report. The plan shows that the County has sufficient funding in the current fiscal year and subsequent fiscal year budgets to meet its estimated cost for complying with the impervious surface restoration requirement.

The County's annual Watershed Protection and Restoration Program Annual Report (WPRP) is submitted with this NPDES MS4 annual report. The report details the funding structure, deposits into the fund, and expenditures from the fund for FY 2020. Funds deposited into the County's watershed protection and restoration fund in FY 2020 were sourced from general obligation bonds, metropolitan district funds, and stormwater waiver fees.

CERTIFICATION

WHEREAS, the provisions of § 4-202.1 of the Environment Article of the Annotated Code of Maryland require Baltimore County to file a financial assurance plan to the Maryland Department of the Environment that demonstrates that it has sufficient funding to meet the impervious surface restoration plan requirements of the County's National Pollutant Discharge Elimination System Phase I Municipal Separate Storm Sewer System Permit; and

WHEREAS, the provisions of this law require that "a county or municipality may not file a financial assurance plan under this subsection until the local governing body of the county or municipality: (i) Holds a public hearing on the financial assurance plan; and (ii) Approves the financial assurance plan."

NOW, THEREFORE, I certify that:

1. A public hearing was held on the financial assurance plan on 12/1/2020 (Date);
2. The local governing body approves the aforementioned financial assurance plan; and
3. Under penalty of law, the information in this financial assurance plan is, to the best of my knowledge and belief, true, accurate, and complete.

COUNTY COUNCIL OF BALTIMORE COUNTY, MARYLAND
Legislative Session 2020, Legislative Day No. 27

Resolution No. 134-20

Mrs. Cathy Bevins, Chair
By Request of County Executive

By the County Council, November 16, 2020

A RESOLUTION approving the County's Financial Assurance Plan under the Watershed Protection and Restoration Program;

WHEREAS, § 4-202.1 of the Environment Article of the Annotated Code of Maryland (EN) requires that every political subdivision that has a National Pollution Discharge Elimination System (NPDES) Phase I Municipal Separate Storm Sewer System Permit (MS4 Permit) must file a Financial Assurance Plan (FAP) with the Maryland Department of the Environment on or before July 1, 2016 and then every two years thereafter on the anniversary date of the issuance of its MS4 Permit; and

WHEREAS, Baltimore County received its MS4 Permit on December 23, 2013; and

WHEREAS, EN § 4-202.1 requires the FAP to identify:

1. Actions that will be required of the county to meet the requirements of its NPDES Phase I MS4 Permit;
2. Projected annual and 5-year costs for the county to meet the impervious surface restoration plan requirements of its NPDES Phase I MS4 Permit;
3. Projected annual and 5-year revenues or other funds that will be used to meet the costs for the county to meet the impervious surface restoration plan requirements of its NPDES Phase I MS4 Permit;
4. Any source of funds that will be utilized by the county to meet the requirements of its NPDES Phase I MS4 Permit; and

5. Specific actions and expenditures that the county implemented in the previous fiscal years to meet its impervious surface restoration plan requirements under its NPDES Phase I MS4 Permit; and

WHEREAS, the County Executive approved the county's FAP on December 8, 2020; and

WHEREAS, EN § 4-202.1 requires the county's local governing body to hold a public hearing on the FAP; and

WHEREAS, the County Council held the required public hearing on December 1, 2020; now, therefore

BE IT RESOLVED BY THE BALTIMORE COUNTY COUNCIL, that the County Council approves the Financial Assurance Plan; and

BE IT FURTHER RESOLVED, that the County Executive shall forward the Financial Assurance Plan to the Maryland Department of the Environment immediately on approval by the County Council.

CERTIFICATION

WHEREAS, the provisions of § 4-202.1 of the Environment Article of the Annotated Code of Maryland require Baltimore County to file a financial assurance plan to the Maryland Department of the Environment that demonstrates that it has sufficient funding to meet the impervious surface restoration plan requirements of the County's National Pollutant Discharge Elimination System Phase I Municipal Separate Storm Sewer System Permit; and

WHEREAS, the provisions of this law require that "a county or municipality may not file a financial assurance plan under this subsection until the local governing body of the county or municipality: (i) Holds a public hearing on the financial assurance plan; and (ii) Approves the financial assurance plan."

NOW, THEREFORE, I certify that:

1. A public hearing was held on the financial assurance plan on 12/1/2020 (Date);
2. The local governing body approves the aforementioned financial assurance plan; and
3. Under penalty of law, the information in this financial assurance plan is, to the best of my knowledge and belief, true, accurate, and complete.

Check with MS4 Geodatabase:

Type, class, impervious acres, implementation cost and implementation status should match the various geodatabase tables

Notes:

1. Use BMP domains from the MS4 Geodatabase.
2. Complete, Under Construction, Planning, or Proposed.
3. Use Fiscal Year (FY)
4. For street sweeping indicate the annual frequency that the streets are swept, and for storm drain or catch basin cleaning report the pounds of material removed.
5. Average IMP ACRES for Operational BMPs should be the average of BMP 1 + the average of BMP 2, etc.
IMPL COST is a summation and not an average.
6. Baltimore County historically employed the "mass loading approach" to calculating pollutant load reductions from street sweeping, therefore pounds of material removed is reported instead of annual frequency that streets are swept.

VERSION 8/20/20

Article 4-202.1(j)(1)(i)2: Projected annual and 5-year costs for the county or municipality to meet the impervious surface restoration plan requirements of its National Pollutant Discharge Elimination System Phase I Municipal Separate Storm Sewer System Permit.

Check with MS4 Geodatabase:

(AltBMPLine, AltBMPPoint, AltBMPPoly, and RestBMP)-- aggregated by type and status.

Notes:

1. Use BMP domains from the MS4 Geodatabase.
2. Complete, Under Construction, Planning, or Proposed.
3. For street sweeping indicate the annual frequency that the streets are swept, and for storm drain or catch basin cleaning report the pounds of material removed.
4. Average IMP ACRES for Operational BMPs should be the average of BMP 1 + the average of BMP 2, etc. IMPL COST is a summation and not an average.
