

CERTIFICATION

WHEREAS, the provisions of § 4-202.1 of the Environment Article of the Annotated Code of Maryland require Baltimore County to file a financial assurance plan to the Maryland Department of the Environment that demonstrates that it has sufficient funding to meet the impervious surface restoration plan requirements of the County's National Pollutant Discharge Elimination System Phase I Municipal Separate Storm Sewer System Permit; and

WHEREAS, the provisions of this law require that "a county or municipality may not file a financial assurance plan under this subsection until the local governing body of the county or municipality: (i) Holds a public hearing on the financial assurance plan; and (ii) Approves the financial assurance plan."

NOW, THEREFORE, I certify that:

1. A public hearing was held on the financial assurance plan on 12/13/2022 (Date);
2. The local governing body approves the aforementioned financial assurance plan; and
3. Under penalty of law, the information in this financial assurance plan is, to the best of my knowledge and belief, true, accurate, and complete.

Title

COUNTY COUNCIL OF BALTIMORE COUNTY, MARYLAND
Legislative Session 2022, Legislative Day No. 21

Resolution No. 50-22

Mr. Julian E. Jones, Jr., Chairman
By Request of County Executive

By the County Council, December 5, 2022

A RESOLUTION approving the County's Financial Assurance Plan under the Watershed Protection and Restoration Program.

WHEREAS, § 4-202.1 of the Environment Article of the Annotated Code of Maryland (EN) requires that every political subdivision that has a National Pollution Discharge Elimination System (NPDES) Phase I Municipal Separate Storm Sewer System Permit (MS4 Permit) must file a Financial Assurance Plan (FAP) with the Maryland Department of the Environment (MDE) on or before July 1, 2016 and then every two years thereafter on the anniversary date of the issuance of its MS4 Permit; and

WHEREAS, Baltimore County received its MS4 Permit on November 5, 2021; and

WHEREAS, in a letter dated July 22, 2022, MDE stated that Baltimore County's FAP should be submitted by December 31, 2022; and

WHEREAS, EN § 4-202.1 requires the FAP to identify:

1. Actions that will be required of the county to meet the requirements of its NPDES Phase I MS4 Permit;
2. Projected annual and 5-year costs for the county to meet the impervious surface restoration plan requirements of its NPDES Phase I MS4 Permit;

3. Projected annual and 5-year revenues or other funds that will be used to meet the costs for the county to meet the impervious surface restoration plan requirements of its NPDES Phase I MS4 Permit;
4. Any source of funds that will be utilized by the county to meet the requirements of its NPDES Phase I MS4 Permit; and
5. Specific actions and expenditures that the county implemented in the previous fiscal years to meet its impervious surface restoration plan requirements under its NPDES Phase I MS4 Permit; and

WHEREAS, the County Executive approved the county's FAP on _____, 2022; and

WHEREAS, EN § 4-202.1 requires the county's local governing body to hold a public hearing on the FAP; and

WHEREAS, the County Council held the required public hearing on December 13, 2022;
now, therefore

BE IT RESOLVED BY THE BALTIMORE COUNTY COUNCIL, that the County Council approves the Financial Assurance Plan; and

BE IT FURTHER RESOLVED, that the County Executive shall forward the Financial Assurance Plan to the Maryland Department of the Environment immediately on approval by the County Council.

BE IT FURTHER RESOLVED, that this Resolution shall take effect from the date of its passage by the County Council.

**Baltimore County– Fiscal Year 2022
Financial Assurance Plan
and
Watershed Protection and Restoration Program Annual Report
as required under the
Watershed Protection and Restoration Program
December 31, 2022**

Executive Summary

The submission of Baltimore County’s Financial Assurance Plan (FAP) and Watershed Protection and Restoration Program (WPRP) annual report to the Maryland Department of the Environment (MDE) fulfills requirements specified in the Maryland Article – Environment, Section 4-202.1. These plans and reports are being filed to MDE in order to document all actions implemented by Baltimore County to comply with its National Pollutant Discharge Elimination System (NPDES) municipal separate storm sewer system (MS4) permit and demonstrate the County’s ability to pay for these activities through the Watershed Protection and Restoration Fund.

An MS4 permit was issued to Baltimore County on November 5, 2021 and Baltimore County will submit an annual report to MDE on or before December 31, 2022 as required by the permit. The annual report is based on the State’s fiscal year (FY) and includes updates on the County’s MS4 programs and impervious surface area restoration. Monitoring results are based on calendar year. Baltimore County has continued implementing its MS4 program and this Executive Summary documents achievements detailed in its 2022 annual report.

In compliance with the Maryland Article Section 4-202.1, the following FAP and WPRP annual report includes all activities that have been completed in compliance with Baltimore County’s MS4 permit, and five-year projections for the implementation of its stormwater program and best management practices (BMPs) necessary for meeting permit requirements. Specifically, these plans and reports document complete implementation and financial data for FY20 – FY22.

A major tenet of the FAP and WPRP annual report is to demonstrate the financial wherewithal for meeting MS4 permit impervious surface area restoration requirements. In order to document this ability, Baltimore County is providing MS4 program implementation projections for FY23, FY24, FY25, FY26, and FY27. The next FAP will be submitted in two years with the County’s MS4 permit annual report. The next WPRP annual report will be submitted next year with the County’s MS4 permit annual report. The sections in this Executive Summary follow the order of Baltimore County’s MS4 permit found in Part IV, Standard Permit Conditions, and highlight the major achievements for each program element. The Baltimore County Annual MS4 Report can be found at: <http://www.baltimorecountymd.gov/Agencies/environment/npdes/> for more detailed information.

A. Permit Administration

The County has designated an NPDES Management Committee, composed of representatives from agencies involved in NPDES activities, that meets on a periodic basis for updates and coordination. There were no major organizational changes over the last year.

B. Legal Authority

The County continues to maintain adequate legal authority in all areas related to implementation of its NPDES permit. There were no regulatory changes over the last year.

C. Source Identification

The 2022 annual report utilizes the MDE MS4 geodatabase format for all annual data reporting requirements.

D. Management Programs

1. Stormwater Management

As of July 1, 2022, there are 4,649 built facilities. 32,314 acres of land are treated by one or more of these facilities. The County completed 2,038 stormwater facility inspections during FY22.

2. Erosion and Sediment Control

In FY22 there was a slight increase in number of grading permits issued (166) yet acres disturbed decreased (755) compared to FY21 (145 permits and 849 acres), and an increase in in new building permits (1,161, up from 972). A total of 5,378 sediment control inspections were conducted with 1,129 enforcement actions (860 correction notices and 269 stop work orders). Baltimore County submitted an application to MDE for renewal of delegated authority for erosion and sediment control on October 19, 2021. MDE approved this application and delegation of authority to Baltimore County is effective through June 30, 2024.

3. IDDE

The County screened 192 storm drain outfalls in calendar year 2021. Of the outfalls that were screened 113 were found to be above water quality thresholds. The County investigated 254 complaints. Of the 254 complaint investigations 232 were closed and 22 are still under investigation.

The County also conducts hotspot surveys of commercial/industrial sites. A total of 135 sites were surveyed during FY 2022. Of the 135 sites, 19% (22 sites) were confirmed hotspots.

The County continues to implement a proactive IDDE program. Additionally, pollution reductions from individual illicit discharge eliminations are available within the Chesapeake Bay Model. The County has implemented a system for tracking and reporting these pollution reductions, and is using the IDDE program to make progress on TMDL waste load allocations and the MS4 impervious surface restoration requirement.

4. *Trash and Litter*

The County has continued litter reduction efforts including instream monitoring and litter removal programs. Baltimore County continued to implement the trash and litter reduction strategy and the trash TMDL implementation plan. Instream monitoring removed a total of 728.81 pounds of trash from streams within Gwynns Falls and Jones Falls.

The County is in a multi-year contract for education and outreach services. During FY 2022, anti-litter education and outreach programming was implemented in Pikesville to increase knowledge of best waste management practices and county programs. These efforts were formed with the goal of reducing litter from multiple sources including residential and business sectors. In March 2022 the County finished collecting data for an ongoing upland visual study to measure the effectiveness of these efforts.

In April FY22 the County implemented an initiative called Balt Co Litter Blitz. This initiative encouraged residents to register or volunteer for litter cleanups in the County. Residents had the option to pick up free bags and gloves at designated County owned buildings. The Litter Blitz initiative resulted in 83 registered cleanups, over 1,600 volunteers engaged, and an estimated 13,841 pounds removed.

5. *Property Management and Maintenance*

The County's industrial sites are in compliance with the General Stormwater Discharge Permit for Industrial Activity (12-SW-A). There were 24 permits in effect in FY22 for general government operations, plus 13 Baltimore County Public School sites and the three campuses of the Community College of Baltimore County. Stormwater Pollution Prevention Plans (SWPPP) are maintained for all 40 of the county's industrial sites and staff are trained annually. Sites are inspected via Quarterly Visual Monitoring, Routine Facility Inspections, and Comprehensive Annual Inspections.

Chemical application of fertilizer, pesticide/herbicide, and deicer is reported for all county property; efforts are being made to reduce the amount of chemicals applied.

During FY 2022 the County removed 572 tons of debris through the street sweeping program and 110 tons of debris through the storm drain cleaning program.

The County acknowledges its new permit requirements to develop Good Housekeeping Plans for eligible county owned sites and to develop a Salt Management Plan for winter deicer use. Dialogs with relevant county agencies have been initiated.

6. *Public Education*

The County has continued to enhance and expand its education and outreach efforts across multiple media. Baltimore County has recorded a significant increase in direct personal engagement over the past years, due largely to greater engagement of the County's on-call outreach contract. Continued focus on enhancing social media reach, chiefly through the "Clean Green Baltimore County" Facebook page, have also been recorded. Baltimore County's MS4 permit (effective Nov 2021) requires a minimum of 150 education and outreach efforts to be achieved each year. In FY22 Baltimore County and its contributing partners have recorded 318 education and outreach efforts.

E. Stormwater Restoration

Replacing Annual Practices From the Previous Permit

Baltimore County completed the obligation to install BMPs providing 471 acres of impervious credit to replace annual practices that were used to meet our prior permit requirements.

Progress Toward the Current Permit

The final impervious accounting guidance for the next MS4 permit was released by MDE on November 5, 2021. Applying this final guidance, the County completed 1,812.4 acres of impervious surface restoration during the period between the expiration of the previous permit and the end of FY22 via perennial BMPs. After applying 471 of these acres to replace annual practices from the previous permit, 1,341.4 acres will apply towards the County's current MS4 permit requirement to restore 2,696 impervious acres.

Year 1 BMPs and Annual Benchmarks

Baltimore County is required by the current permit to complete, or replace with other individual practices, the BMPs listed in the Year 1 BMP Portfolio in Appendix B of the permit which totaled 748 acres. Year 1 includes the period of time from the expiration of the previous permit through fiscal year 2022. During that time Baltimore County completed restoration equivalent to 1,341.4 impervious acres. After accounting for annual practices this accounts for 52% of the restoration required by the permit, exceeding the year 1 benchmark of 20%.

Next Year's BMPs

Baltimore County plans to implement BMPs equivalent to 346.8 impervious acres in fiscal year 2023.

F. Countywide TMDL Stormwater Implementation Plan

1. Addressing MDE Comments on Submitted TMDL Implementation Plans

Baltimore County responded to MDE comments on implementation plans for phosphorus and sediment in Liberty Reservoir watershed on Nov. 4, 2022.

2. Implementation Plans for New TMDLs

Baltimore County will continue to submit TMDL Implementation Plans for new TMDLs established as required by the NPDES Permit. The Baltimore Harbor Non-Tidal Sediment TMDL implementation plan will be submitted within one year of its approval date, January 27, 2022.

3. TMDL Compliance

Baltimore County continues to calculate its progress toward meeting applicable WLAs included in EPA approved TMDLs through its reporting, chiefly in Sections 6, 9, and 10 of this annual report. Our watershed monitoring program assists with tracking progress toward biological, bacterial, and chemical endpoints, while tracking the credited pollutant load reductions provides documentation on progress toward meeting assigned WLAs and assists with long range planning for implementation to better reach water quality endpoints of many types.

Progress toward addressing phosphorus WLAs has been challenging: 1 out of 5 watersheds have attained the WLA, 1 is on target, and 3 are behind schedule (Liberty, Prettyboy and Loch Raven Reservoirs). Nitrogen WLAs have also been a challenge: Back River and Baltimore Harbor are both behind schedule. Sediment WLAs have seen many positive gains: 2 of 7 have attained the WLA, 1 is on target, and 4 are behind schedule (Back River, Lower Gunpowder, Gwynns Falls and Liberty Reservoir). Progress on the trash WLA is behind schedule (Baltimore Harbor). Implementation targets are based on deadlines set within each TMDL implementation plan. For most nutrient and sediment WLAs the self-imposed deadline had been 2025 (with the exception of Liberty Reservoir being 2030). The updates to the Watershed Model from Phase 5 to Phase 6 have pushed the WLA targets out of reach for these deadlines and have necessitated updates to estimated years of completion for a majority of the TMDLs. Details are provided in the addendum to this report titled “Baltimore County EPS Countywide TMDL Stormwater Implementation Plan 2022”. Other WLAs (i.e. PCBs, bacteria, trash, etc., which have different methods of crediting implementation progress) have been given a 2035 deadline.

In 2022 the Combined 2020-2022 Maryland Integrated Report of Surface Water Quality revealed that Water Quality Standards for Mercury in Loch Raven and Prettyboy Reservoirs are now being met and those waterways are determined to no longer be impaired by that pollutant.

4. Public Participation

Baltimore County publishes all draft restoration plans on the County webpage for public review and comment. The public comment periods for these watershed assessments and restoration plans are at least 30 days, and a comment response document is produced and attached to each plan to publicly acknowledge and address received comments. Baltimore County is currently assessing other methods of driving public participation in its watershed assessment and restoration processes.

G. Assessment of Controls

In calendar year 2021, Baltimore County met the requirements for the watershed restoration and stormwater management assessment utilizing the Scotts Level Branch biological and physical habitat monitoring. In addition, the County has continued the following programs to assess the conditions of Baltimore County waters and locate areas in need of restoration, which aid the progress in meeting TMDL reduction targets:

- Bacteria monitoring program
 - 27 fixed sites countywide were monitored each month for the bacteria trend monitoring program generating 476 samples in CY2021
- Trash monitoring program
 - 24 fixed sites were monitored for trash accumulation in the Gwynns Falls and Jones Falls watershed in CY2021
- Chemical monitoring program
 - 40 fixed sites countywide were monitored each month for the chemical trend monitoring program generating 480 samples plus 1 final sampling of a suspended site in CY2021
 - 12 Scotts Level Branch storm events were collected with 12 storm events at the instream monitoring location and 11 storm events at the outfall location. 12 rounds of baseflow monitoring were collected for a total of 156 samples.

- Biological monitoring programs
 - 50 randomly selected sites were sampled for the stream random point program
 - 24 additional randomly selected sites were sampled for the sediment TMDL biological monitoring program
 - 25 randomly selected sites were sampled for the tidal water random point program
 - 6 fixed sites were monitored for the reference site monitoring program
 - 11 fixed sites were monitored for the sentinel site monitoring program
- Geomorphological monitoring program
 - 15 fixed cross sections were measured in the Scotts Level watershed
- Restoration effectiveness monitoring program
 - 11 fixed biological monitoring sites were monitored in the Scotts Level watershed
 - 17 fixed biological monitoring sites were monitored in the Minebank Run, Cowen Run, Red Run, and Slaughterhouse Run watersheds
- Special studies monitoring program
 - 7 tidal segments were monitored for the Submerged Aquatic Vegetation Monitoring Program

H. Program Funding

The EPS funding for capital and operating budgets for FY2022 are \$26,644,000 and \$7,182,203, respectively. The County's total expenditures on impervious surface restoration during FY2022 were \$31,083,996.

The County's annual Watershed Protection and Restoration Program Annual Report (WPRP) is submitted with this NPDES MS4 annual report. The report details the funding structure, deposits into the fund, and expenditures from the fund for FY 2022. Funds deposited into the County's watershed protection and restoration fund in FY 2022 were sourced from general funds, general obligation bonds, metropolitan district funds, and state aid (grants). The County's biennial Financial Assurance Plan (FAP) is submitted with this NPDES MS4 annual report. The FAP lists the actions required of the County to meet the impervious surface restoration requirement of the MS4 permit, including actions completed through FY2022 and planned for future years. The FAP shows costs, revenues, and funding sources pertinent to MS4 permit requirements, for the current year (FY2022), prior years, and projections through FY2027. The FAP demonstrates that the County has sufficient funding in the current and subsequent fiscal year budgets to meet its estimated costs as per Md. Code Ann. Environment § 4-202.1(j)(2).

Check with MDE Geodatabase:

Rest BMP ID, type, class, number of BMPs, impervious acres, built date, implementation cost should match the various geodatabase tables for BMPs (AltBMPLine, AltBMPPoint, AltBMPPoly, and RestBMP)-- aggregated by type and status.

Notes:

1. Use BMP domains from MDE Geodatabase.
2. % ISR Complete compared to continued annual alternative ISR.
3. Insert additional rows as necessary.
4. Impervious Acres are the average for the time period, Implementation Costs are totaled.
5. % ISR Complete compared to ISR new permit.
