Re: Agency Interest Number: 168212
Tracking Number: 202060606
Tidal Authorization Number: 20-WL-0402

Dear Deale Beach Community Association:

Your project did not qualify for approval under the Maryland State Programmatic General Permit (MDSPGP); therefore, a separate review and issuance of the federal permit will be required by the U.S. Army Corps of Engineers. The federal permit is not attached.

Additionally, your project required a Wetlands License to be approved and issued by the Maryland Board of Public Works (BPW). The Wetlands License will be sent to you by BPW's Wetlands Administrator.

A project that does not qualify for approval under the MDSPGP requires an individual Water Quality Certification (WQC) to be issued by the Maryland Department of the Environment, which is attached. Please take a moment to read and review your WQC to ensure that you understand the limits of the authorized work and all of the general and special conditions.

You should not begin any work until you have obtained all necessary State, local, and federal authorizations. Please contact Melissa McCanna at melissa.mccanna@maryland.gov or 410-537-4053 with any questions.

Sincerely,

Tammy Roberson
Tidal Wetlands Division Chief
Tidal Wetlands Division

STATE OF MARYLAND

WATER QUALITY CERTIFICATION

22-WQC-0001

EFFECTIVE DATE: **February 2, 2022**
CERTIFICATION HOLDER: **Deale Beach Community Association**
ADDRESS: **Attn: Patrick Mehlman**
938 Main St
Deale, MD 20751
PROJECT LOCATION: **953, 955 and 957 Bay Dr**
Deale, MD 20751

UNDER AUTHORITY OF SECTION 401 OF THE FEDERAL WATER POLLUTION CONTROL ACT AND ITS AMENDMENTS AND IN ACCORDANCE WITH § 9-313 THROUGH § 9-323, INCLUSIVE, OF THE ENVIRONMENT ARTICLE, ANNOTATED CODE OF MARYLAND, THE MARYLAND DEPARTMENT OF THE ENVIRONMENT, WATER AND SCIENCE ADMINISTRATION HAS DETERMINED THAT THE REGULATED ACTIVITIES DESCRIBED IN THE REQUEST FOR CERTIFICATION FOR THE PROPOSED DEALE BEACH COMMUNITY ASSOCIATION LIVING SHORELINE AND AS DESCRIBED IN THE ATTACHED PLAN SHEETS DATED JANUARY 5, 2022 AND ANY SUBSEQUENT MODIFICATIONS APPROVED BY THE DEPARTMENT WILL NOT VIOLATE MARYLAND'S WATER QUALITY STANDARDS, IF CONDUCTED IN ACCORDANCE WITH THE CONDITIONS OF THIS CERTIFICATION.

THIS CERTIFICATION DOES NOT RELIEVE THE APPLICANT OF RESPONSIBILITY FOR OBTAINING ANY OTHER APPROVALS, LICENSES, OR PERMITS IN ACCORDANCE WITH FEDERAL, STATE, OR LOCAL REQUIREMENTS AND DOES NOT AUTHORIZE COMMENCEMENT OF THE PROPOSED PROJECT. A COPY OF THIS REQUIRED CERTIFICATION HAS BEEN SENT TO THE CORPS OF ENGINEERS. THE CERTIFICATION HOLDER SHALL COMPLY WITH THE CONDITIONS LISTED BELOW.

PROJECT DESCRIPTION

Construct one 75-foot long by 25-foot wide and one 70-foot long by 25-foot wide sand containment structures that are 2.8 feet above mean high water; and to fill and grade with 1300 cubic yards of sand along 175 feet of eroding shoreline and plant 8400 square feet of wetland vegetation all within 85-foot channelward from the mean high water line at an existing bulkhead.

GENERAL CONDITIONS

1. This Certification does not obviate the need to obtain required authorizations or approvals from other State, federal or local agencies as required by law.

2. This Certification does not authorize any injury to private property, any invasion of rights, or any infringement of federal, state, or local laws or regulations.
3. The Certification Holder shall allow authorized representatives of the Department access to the site of authorized activities during normal business hours to conduct inspections and evaluations of the operations and records necessary to assure compliance with this Certification.
4. This Certification is valid for the project identified herein and the associated U.S. Army Corps of Engineers authorization 202060606 until such time that it expires or is not administratively extended.

SPECIAL CONDITIONS

- A. The Certification Holder shall meet all water quality-related performance standards and conditions required by the Department in any state-issued authorization for activities in tidal wetlands to ensure that any discharges will not result in a failure to comply with water quality standards in COMAR 26.08.02. or other water quality requirements of state law or regulation.
- B. The issuance of this license is not a validation or authorization by the Department for any of the existing structures depicted on the plan sheets on the subject property that is not part of the authorized work description, nor does it relieve the Certification Holder of the obligation to resolve any existing noncompliant structures and activities within tidal wetlands.
- C. The Certification Holder shall construct the marsh establishment area in accordance with the following conditions:
 1. The Certification Holder shall use clean substrate fill material, no more than 10% of which shall pass through a standard number 100 sieve.
 2. The marsh establishment area shall be planted within one year following completion of the filling operation.
 3. The marsh establishment project shall be maintained as a wetland, with non-nuisance species' aerial coverage of at least 85% for three consecutive years. If 85% coverage is not attained, the reasons for failure shall be determined, corrective measures shall be taken, and the area shall be replanted.
 4. If the fill is graded hydraulically, the Certification Holder shall use a turbidity curtain around the perimeter of the instream work.
 5. If the existing bank is to be cleared or graded:
 - a. The Certification Holder shall perform all work under and in accordance with an approved Soil Erosion and Sediment Control Plan from the applicable sediment and erosion control agency; and
 - b. The Certification Holder shall perform all work under and in accordance with the Critical Area requirements of the local jurisdiction in the form of an approved Buffer Management Plan.
- D. The Certification Holder shall accept the terms of the marsh maintenance plan by signing and returning the standard plan to the Water and Science Administration, Tidal Wetlands Division prior to commencement of any work authorized under this License. If the Certification Holder wishes to

propose an alternative marsh maintenance plan, the alternative plan must be submitted to and approved by the Tidal Wetlands Division, Water and Science Administration, prior to commencement of any work authorized under this License. Any alternative plan must provide assurances of success that are at least equivalent to those of the standard plan, in terms of the extent of native marsh plant coverage, elimination of invasive species and timeframe for plant establishment.

- E. The marsh establishment area shall be planted within one year following embayment structure installation with *Spartina patens* and American beachgrass (*Ammophila breviligulata*) in rows no farther than 24 inches apart and plants no farther than 24 inches apart.
- F. All existing vegetated tidal wetlands areas must be maintained as vegetated tidal wetland and maintained to ensure 85% coverage of native tidal wetland species. Any existing vegetated tidal wetland vegetation to be disturbed must be transplanted immediately.
- G. The Certification Holder shall submit photographs on an annual basis for the first five growing seasons to the Tidal Wetlands Division, Water and Science Administration to document the success of the project in terms of the extent of native marsh plant coverage. Photographs shall be taken from at least two directions, as necessary to fully depict the living shoreline.

CERTIFICATION APPROVED

D. Lee Currey, Director
Water and Science Administration
