

Instructions to Create and View County Maps

- 1. Open Google Earth (To install Google Earth, click here <http://www.google.com/earth/download/ge/>)**
2. Then return to the MDE page with the county links
- 3. Right-click on the desired county link**
- 4. Left-click on 'Save target as'**
The extension in the file name field will be XML – Before saving, change the extension to **KML**
- 5. Save the file to your computer desktop**
- 6. Double-click the KML file you saved to your desktop**
Google Earth will zoom to the appropriate county indicating those shoreline segments where stabilization can be performed.
